Sound Choices

Enhancing Capacity for Evidence-Informed Health Policy
# Contents

Acknowledgements ......................................................................................................................... 10
Preface ............................................................................................................................................ 11
Executive summary ............................................................................................................................ 12
  Introduction ................................................................................................................................. 12
  Current capacity needs .................................................................................................................. 13
  Capacity strategies ....................................................................................................................... 13

Chapter 1
Introduction .......................................................................................................................................... 15

Chapter 2
Building evidence-informed policy environments ............................................................................. 21
  Introduction ................................................................................................................................... 23
    Understanding policy contexts ...................................................................................................... 23
  The role of interests, ideology and values ....................................................................................... 24
  Policy-making processes .............................................................................................................. 28
    The policy cycle .......................................................................................................................... 29
    How policy learning takes place: ideology and beliefs .................................................................. 31
  What counts as evidence? Whose evidence counts? ....................................................................... 32
  So what works? ............................................................................................................................... 33
  Changing the metaphor: towards evidence-informed policy environments .................................. 35
  Conclusion .................................................................................................................................... 36

Chapter 3
A framework for evidence-informed health policy-making .............................................................. 37
  Background .................................................................................................................................... 39
  Capacity ......................................................................................................................................... 39
    What do we mean by capacity? ...................................................................................................... 39
    Capacity development ................................................................................................................. 42
  Overview of the framework .......................................................................................................... 43
    The functional level ..................................................................................................................... 44
    The organizational level ............................................................................................................. 47
    Organizational capacity .............................................................................................................. 49
    The national context and wider environment ............................................................................. 51
  Capacity strengthening and releasing strategies ........................................................................... 52
    Mapping capacity-development strategies ................................................................................. 53
    Lessons emerging from capacity-development initiatives ....................................................... 54
  Conclusions ................................................................................................................................... 56
Chapter 4

Enhancing capacity for prioritizing health policy and systems research agendas

Chapter 6

Capacity for evidence filtration and amplification ........................................... 91
Introduction ........................................................................................................ 93
Filtering and amplification: a brief review .......................................................... 93
  Filtering – selecting and organizing evidence .................................................... 93
  Amplification – communicating evidence ......................................................... 94
Organizations and networks involved in filtering and amplification in health ... 96
  The role of civil society organizations and networks ......................................... 96
  Understanding the basis of civil society organization legitimacy .................... 99
Building capacity for filtering and amplification ................................................. 99
  Understanding the political context ................................................................ 100
  Enhancing capacities to filter and amplify research evidence ......................... 101
  Promoting scientifically based ‘knowledge brokering’ ..................................... 104
Conclusions and recommendations .................................................................. 105

Chapter 7

Enhancing capacity to use HPSR evidence in policy-making processes .......... 107
Introduction ....................................................................................................... 109
Policy processes and the use of evidence by national policy-makers ............. 109
  The policy process ......................................................................................... 109
  How do policy-makers use research evidence? .............................................. 110
  How contextual factors affect the use of evidence in policy ......................... 112
Organizations involved in national policy-making and their capacity needs .. 112
  Organizations involved in policy-making ...................................................... 112
  Capacity needs of policy-making institutions .............................................. 114
Strategies to enhance capacity to use evidence in policy-making ................. 117
  Enhance supply of policy-relevant research products .................................... 117
  Enhance capacity of policy-making organizations to use evidence ................. 120
  Establish new organizational mechanisms to support use of evidence in policy .. 120
  Promote networking ..................................................................................... 122
  Establish norms and regulations regarding evidence use in policy-making .... 123
Conclusions ........................................................................................................ 123

Chapter 8

Sound Choices: addressing the capacity challenge ......................................... 127
Introduction ....................................................................................................... 128
Capacity needs ................................................................................................. 128
List of boxes

Box 1.1 Health Policy and Systems Research .......................................................... 17
Box 2.1 The ‘two communities’ model of researchers and policy-makers .......... 26
Box 2.2 Policy communities and networks .............................................................. 27
Box 2.3 The policy process and how networks may affect it ............................. 30
Box 2.4 Values affect policy .................................................................................. 32
Box 2.5 Evidence – what is it? ............................................................................. 34
Box 2.6 Evidence is complex ............................................................................... 35
Box 2.7 The importance of the presentation of evidence .................................... 35
Box 2.8 Evidence and policy implementation ...................................................... 36
Box 4.1 Main actors influencing national health policy and systems research agendas ........................................................................................................... 61
Box 4.2 Health policy and systems research topics proposed by the Task Force on Health Systems Research in 2004 .......................................................... 63
Box 4.3 Examples of global and regional networks ............................................. 64
Box 4.4 HPSR priority-setting examples from Latin America ............................. 66
Box 4.5 Examples of participative approaches to setting priorities ................. 69
Box 5.1 The returns from health systems research .............................................. 78
Box 5.2 Experiences with institutional sustainability in the health economics and policy units of Bangladesh, Kyrgyzstan and Thailand .......................... 85
Box 5.3 Establishing an HPSR unit in Hong Kong SAR ...................................... 86
Box 5.4 Principles of research partnership .............................................................. 90
Box 6.1 The implications of filtered evidence for HIV/AIDS policy in South Africa .......................................................... 95

Acknowledgements

This Biennial Review is the joint product of a number of people, and the Alliance wishes to acknowledge and thank them for their input.

The principal authors are as follows:

Andrew Green (editor-in-chief and author Chapters 1, 3 and 8); Sara Bennett (coordinating editor and co-author Chapters 3, 6 and 7); Gill Walt (author Chapter 2); Erica Gadsby (co-author Chapter 3); Don de Savigny (author Chapter 4); Ravindra P. Rannan-Eliya (author Chapter 5); Per Strand (co-author Chapter 6); Susannah Mayhew (co-author Chapter 7); Sam Adjei (co-author Chapter 7); Siriwan Pitayarangsarit (co-author Appendix: Thailand case-study); Viroj Tangcharoensathien (co-author Appendix: Thailand case-study).

Technical support was provided to the publication by Erica Gadsby and Alix Beith. Kai Lashley and Gisele Weiss completed the final copy-edit of the Review. Lydia Al-Khudri managed the production of the report.

Technical inputs were provided by various people through participation at workshops and reviewing chapter drafts:

Irene Ageypong        Mary Ann Lansing        Helen Schneider
Lucy Gilson           John Lavis              Freddie Ssengooba
George Gotsadze       Anne Mills             Goran Tomson
Dave McCoy            Indra Pathanaram
Ainura Ibrahimova     Delia Sanchez
