Spread by blood, semen and other body fluids

Hepatitis virus types A, B, C, D and E cause infection and inflammation of the liver that can lead to severe disease and death.

WORLD HEPATITIS DAY 28 JULY

GET TESTED!
YOU ARE AT RISK IF:

- You’ve ever had medical or dental treatment with unsterile instruments
- You’ve received a blood transfusion in a country that does not test for hepatitis
- Your mother was infected with hepatitis when you were born
- You have ever injected drugs
- You are living with HIV

More than 1 MILLION PEOPLE DIE each year from disease caused by hepatitis B & C.

Most of those infected don’t know they have it, INCREASING THE RISK of developing severe liver disease and transmitting the virus to others.
