UN General Assembly votes to hold
High-level meeting on tuberculosis (TB)

The late 1990s saw a dramatic upsurge of the global TB epidemic.

Today, 1.7 million people die of TB.

The UN-High Level meeting is scheduled for September 2018.

The UN High-Level Meeting on TB will be the fifth time the UN has called for a high-level meeting devoted to a health issue.

The meeting will be the most significant political meeting ever held on TB.

The Political Declaration on TB endorsed by Heads of State will form the basis for the future TB response.
