The STEPS survey of chronic disease risk factors in Mozambique was carried out from August 2005 to November 2005. Mozambique carried out Step 1, Step 2 and Step 3. Socio demographic and behavioural information was collected in Step 1. Physical measurements such as height, weight and blood pressure were collected in Step 2. Biochemical measurements were collected to assess blood glucose and cholesterol levels in Step 3. The STEPS survey in Mozambique was a population-based survey of adults aged 25-64. A household sampling design was used to produce representative data for that age range in Mozambique. A total of 3,310 adults participated in the Mozambique STEPS survey. The overall response rate was 98.4%. A repeat survey is planned for 2010 if funds permit.

### Results for adults aged 25-64 years (incl. 95% CI)

</tbody>
</table>

#### Step 1 Alcohol Consumption

| Percentage of abstainers (who did not drink alcohol in the last year) | 54.8% | 39.6% | 65.6% |
| Percentage of current drinkers (who drank alcohol in the last year) | 45.2% | 60.4% | 34.4% |
| Among current drinkers |                        |            |       |
| Percentage who drank alcohol on 4 or more days in the last week | 5.4%  | 7.1%  | 3.2%  |
| Percentage who binge drink (men who had 5 or more / women who had 4 or more drinks on any day in the last week) | -- | 44.8% | 35.1% |

#### Step 1 Fruit and Vegetable Consumption (in a typical week)

| Mean number of days fruit consumed | 2.7 | 2.7 | 2.7 |
| Mean number of servings of fruit consumed on average per day | 1.1 | 1.1 | 1.1 |
| Mean number of days vegetables consumed | 4.2 | 3.9 | 4.4 |
| Mean number of servings of vegetables consumed on average per day | 1.1 | 1.1 | 1.2 |
| Percentage who ate less than 5 combined servings of fruit and/or vegetables on average per day | 95.0% | 95.6% | 94.5% |

#### Step 1 Physical Activity

| Percentage with low levels of activity (defined as <600 MET-minutes/week)** | 6.5% | 6.7% | 6.4% |
| Percentage with high levels of activity (defined as ≥ 3000 MET-minutes/week)** | 85.3% | 83.1% | 87.0% |
| Median time spent in physical activity per day (minutes) (with interquartile range) | 385.7 (205.7-548.6) | 374.3 (192.9-531.4) | 394.3 (208.6-559.6) |
| Percentage not engaging in vigorous physical activity | 31.1% | 33.1% | 29.6% |

** For complete definitions of low and high levels of physical activity, other conditions are specified in the GPAQ Analysis Guide, available at: [http://www.who.int/chp/steps/GPAQ/en/index.html](http://www.who.int/chp/steps/GPAQ/en/index.html)

### Summary of combined risk factors

- current daily smokers
- less than 5 servings of fruits and/or vegetables on average per day
- Low level of activity (<600 MET -minutes)
- overweight (BMI ≥ 25 kg/m\(^2\))
- raised BP (SBP ≥ 140 and/or DBP ≥ 90 mmHg or currently on medication for raised BP)
