

Hepatology & Pancreatobiliary Diseases Working Group

Internal Medicine Topic Advisory Group

Tasks

The Hepatology & Pancreatobiliary Diseases Working Group within the Internal Medicine TAG is contributing to the revision of categories in the ICD relating to diseases of the liver, gallbladder, biliary tree and pancreas. Diseases of the Hepato-biliary system are principally found within Chapter 11 of ICD-10. The Working Group also formulates definitions and diagnostic criteria for the relevant categories, and suggests changes to the classification structure.

Yulan Liu	People's Hospital, Peking University	China	

**Chair

Δ Managing Editor

Progress

The Hepatology & Pancreatobiliary Diseases Working Group was formed under consultation by WHO and the TAG Internal Medicine. The Working Group has identified a managing editor for the alpha drafting of the ICD-11.

Discussions regarding changes to the linearization have started.
