OFFICIAL UPDATES TO ICD-10

The following pages include the official changes to the tabular list, instruction manual and alphabetical index of ICD-10. These changes were approved, in principle, at the Heads of Centres meeting in Cardiff in October 1999 and ratified at the Heads of Centres meetings in Brazil, October 2000. The source for each change is indicated, as is the implementation date.

Relevant changes in other language versions of ICD-10 and in related tools will also have to be made and disseminated by the appropriate authority.

(Note: Every effort has been made in the following pages to reproduce the content of the ICD-10 in the same format as the published volumes. Page references have not been used in all instances since these do not apply to electronic versions of the Classification. Additions/changes have been indicated through the use of instructions, underline and ~~strikeout~~).
