## OFFICIAL UPDATES TO ICD-10

The following pages include the official changes to the tabular list, instruction manual and alphabetical index of ICD-10. These changes were approved in principle at the HoC meeting in Washington DC, October 2001. Each change has been uniquely identified and the source for each change has been indicated. The implementation date has also been documented.

(Note: Every effort has been made in the following pages to reproduce the content of the ICD-10 in the same format as the published volumes. Page references have not been used in all instances since these do not apply to electronic versions of the Classification. Additions/changes have been indicated through the use of instructions, underline and ~~strikeout~~).

This document is not issued to the general public, and all rights are reserved by the World Health Organization (WHO). The document may not be reviewed, abstracted, quoted, reproduced or translated, in part or in whole, without the prior written permission of WHO. No part of this document may be stored in a retrieval system or transmitted in any form or by any means – electronic, mechanical or other – without the prior written permission of WHO.
