

## **Viral Gene Sequences to Assist Update Diagnostics for Swine Influenza A(H1N1) - GenBank Accession Numbers**

**28 April 2009**

The WHO Collaborating Centre for influenza in CDC Atlanta USA has posted the full genome sequences of swine influenza A/California/04/2009 (H1N1) influenza virus on the GenBank sequence database.

To access, go to: <http://www.ncbi.nlm.nih.gov/sites/entrez?db=nucleotide&itool=toolbar>, then enter the accession number as shown below:

- PB2 gene accession number is: FJ966079
- PB1 gene accession number is: FJ966080
- PA gene accession number is: FJ966081
- HA gene accession number is: FJ966082
- NP gene accession number is: FJ966083
- NA gene accession number is: FJ966084
- M gene accession number is: FJ966085
- NS gene accession number is: FJ966086

Tip: to access all the gene sequence records at once, copy the following line of text and paste it into the search bar in the above GenBank web link.

FJ966079,FJ966080,FJ966081,FJ966082,FJ966083,FJ966084,FJ966085,FJ966086
