29	Tibet		0			
30	Hainan		0			
31	Qinghai		0			
	Total		5325			

Note: Date of last update on local transmission is 29 May 2003.

1. NO

No local transmission: No probable SARS case(s) reported over the last 20 days from the day of reporting, or only imported probable SARS case(s) with no further transmission to other(s) locally.

2. Low A:

Imported probable SARS case(s) have produced only one generation of Local probable cases, all of whom are direct personal contacts of the imported case(s).

3. Medium B:

More than one generation of local probable SARS cases, but only among persons that have been previously identified and followed-up as known contacts of probable SARS cases.

4. High C:

High Transmission pattern other than that described about in A and B.

5. Uncertain:

Insufficient information available to specify areas or extent of local transmission.
