Recommendations for strengthening rehabilitation in health systems

Integrate rehabilitation into the health system

Ensure the availability of a multi-disciplinary rehabilitation workforce

Integrate rehabilitation services into and between primary, secondary and tertiary levels of health systems

Ensure hospitals include specialized rehabilitation units for inpatients with complex needs

Implement financing and procurement policies that ensure assistive products are available to everyone who needs them

Ensure both community and hospital rehabilitation services are available

Ensure adequate training is offered to users to whom assistive products are provided

Ensure financial resources are allocated to rehabilitation services

Where health insurance exists or is to become available, ensure rehabilitation services are covered
