Medicines and assistive technology
Rehabilitation
Rehabilitation is a set of interventions designed to reduce disability and optimize functioning in individuals with health conditions in interaction with their environment.

Health condition refers to disease (acute or chronic), disorder, injury or trauma. A health condition may also include other circumstances such as pregnancy, ageing, stress, congenital anomaly, or genetic predisposition. (WHO, 2001)
Along the continuum of care

Primary  Secondary  Tertiary

Acute  Post-acute  Long-term
Multidisciplinary

Health and non-health interventions
Strengthening the health system and its stewardship role we strengthen rehabilitation as a whole

Multisectoral

Health
Finance
Education
Labor
Social
• Strengthening the health system to provide rehabilitation services

• For all with health conditions experiencing disability or limitations in functioning

• Across the life span

• Along the continuum of care
REHABILITATION
