Severe Acute Malnutrition

For the management of severe acute malnutrition with medical complications

Treats 50 children over 3 months for severe acute malnutrition with medical complications

Medicines
Medicines to treat infections, treatments for diarrhoea, antimalarials

Supply and equipment
Thermometers, syringes, perfusions, gloves

Diagnostics
Diagnostics for diseases such as malaria

This kit enables trained medical staff to save the lives of severely malnourished children vulnerable to infections and diseases like diarrhoea.

It must be combined with nutritional care using therapeutic foods and can be adapted to suit the needs of the emergency response.
