July 2018 - A Tropical storm has affected several provinces in Lao PDR and caused the largest flash flood in the past 10 years. Attapeu province is particularly affected. The flash floods have caused severe damages to properties by submerging basic infrastructure, roads, bridges, schools, hospitals, agricultural land and irrigation system. Several UN agencies and NGOs are supporting the government in its response, including WHO. The Food and Drug Department, Ministry of Health Lao PDR together with volunteers from Attapeu Province explained the Five Keys to Safer Food to food handlers in the affected area. Five keys to safer food posters have been distributed to all food establishments and temporary kitchens providing food to the affected people.
