Life expectancy (years), 2012

		Country	WHO region	World Bank income group
Life expectancy	At birth	81	76	79
	At age 60	24	22	23
Healthy life expectancy	At birth	71	67	70

Life expectancy at birth for both sexes increased by 3 year(s) over the period of 2000-2012; the WHO region average increased by 4 year(s) in the same period.

In 2012, healthy expectancy in both sexes was 10 year(s) lower than overall life expectancy at birth. This lost healthy life expectancy represents 10 equivalent year(s) of full health lost through years lived with morbidity and disability.
