Life expectancy at birth for both sexes increased by 4 year(s) over the period of 2000-2012; the WHO region average increased by 4 year(s) in the same period.

In 2012, healthy expectancy in both sexes was 10 year(s) lower than overall life expectancy at birth. This lost healthy expectancy represents 10 equivalent year(s) of full health lost through years lived with morbidity and disability.
