WHO has procured more than $17 million worth of essential and lifesaving medicines and medical supplies in Iraq. Pharmaceuticals account for $5.7 million while non-pharmaceutical supplies account for $11 million.

This is in addition to medicines procured by WHO, valued at $2 million, which were assessed as most urgently needed for IDPs in KR-I. These were directly handed over to the MOH/KRG for further distribution to all the Departments of Health with WHO logistics support.
