

Pakistan Integrated Nutrition Strategy (PINS)

Operational plan

Nutrition Conceptual Framework

Treatment of acute malnutrition

- 625 feeding centers providing therapeutic, supplementary food and required medications (CMAM approach)
- Information management system(NIS, NSS and surveys) to inform the planning and response.
- Capacity building
- Micronutrient supplementation.

Prevention of malnutrition

- Infant and Young Child Feeding (IYCF).
- Deworming.
- Capacity building
- Awareness raising (facility, community and stakeholders)
- (GMP)

Integrated approaches

- CMAM (Nutrition, Health, Food),
- IYCF (Nutrition, Health, Food, WASH)
- Essential Nutrition Package (Nutrition, Health, Food, WASH)

Opportunities for integration

- The recognition of the malnutrition (Acute and chronic) as a problem among all the actors.
- The bases for institutionalized collective and integrated response to address the immediate causes are already in place.
- Availability of clear guidelines, approaches and protocols for the interventions.
- The interventions are open to accommodate underlying causes based interventions.
