HEALTH SYSTEM in north-eastern Nigeria

6 million people in Borno, Yobe and Adamawa States are in need of health care assistance.

Out of 749 health facilities:
- 35% are destroyed
- 29% are partially damaged
- 30% are intact

(In Borno State, including emergency clinics for IDP camps)

60% of functioning health facilities are supported by partners.

About 100 health facilities have been set up to temporarily support the response:
- of which 49 are directly supporting camps for displaced people

Only 8% of health facilities have access to safe water:
- of which 60% have no access to safe water
- of which 32% have no access to water at all

In more than 50% of all health facilities:
- essential newborn care is not available
- >50% are not functioning, mostly as a result of lack of access due to insecurity

18 partners are supporting the response in the health sector.
