research4life
HINARI • AGORA • OARE

To access, please ask your librarian or institutional director for a password, or visit:

HINARI www.who.int/hinari

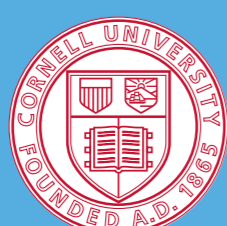

AGORA www.aginternetwork.org

OARE www.oaresciences.org

Note that passwords are for use by students, researchers, faculty and other legitimate members of the institution only and should not be shared outside the institution.

HINARI, AGORA and OARE are the three programmes that make up Research4Life, a public-private partnership that provides free or low-cost online journal access to institutions in developing countries in support of the UN Millennium Development Goals. The programmes are implemented collectively by the World Health Organization, the Food and Agricultural Organization, the United Nations Environment Programme, Yale University, Cornell University, the International Association of Scientific, Technical & Medical Publishers and Microsoft.
