

INSITUTION USER LICENCE FOR HINARI BAND 1

The HINARI Programme is coordinated by the World Health Organization (WHO) as the lead agency. It is a collaboration between the WHO, publishers and other health care content owners intended to provide biomedical and health care research and guideline information to non profit academic and research institutions, governmental and policy making departments in low income countries. Access to this information will generally be provided at low cost or in most cases free by the Publisher, to institutions in many countries with a Gross National Income (GNI) per capita of US \$1000 or less according to the 2005 World Bank Report (HINARI Band 1), and will be governed by the terms of this Licence.

As the HINARI Publishers Statement says, participating publishers will provide "access to a wide range of key biomedical journals at prices which reflect the state of national economies in the developing world" (London, 9 July 2001).

In order to benefit from this offer, qualifying institutions in Band 1 countries which sign up for HINARI access will maintain their existing journal subscriptions, as of the year of their registration with HINARI.

This Licence constitutes a formal and legal agreement between

.....(Institution)

and the Publishers listed on Annexe A for access to and use of the on-line biomedical information published by the Publishers and as amended from time to time on the HINARI Portal <http://www.who.int/hinari>. The Licence is exclusive to the Institution named at the head of the Licence and may not be extended to any other institution or party without the express written agreement of the Publishers. WHO assists eligible institutions to obtain a licence from the Publishers.
