Treatment 2013
Overview – Current global situation
Tsitsi Apollo
Zimbabwe
9.7 million people on ART by end of 2012 - 1.6 million more than at the end of 2011

Actual and projected numbers of people receiving antiretroviral therapy in low-and middle-income countries, and by WHO Region, 2003–2015

People on ART: Progress in all Regions, global increase sustained by high population growth rate in Sub-Saharan Africa

Absolute number of people on ART at end of 2012
+ Absolute increase in 2012

630,000 children globally on ART

Absolute number of children < 15 years on ART at end of 2012

The gap between adult and child ART coverage in 20 high burden countries is widening

Source: Global AIDS Response Progress Reporting (WHO/UNICEF/UNAIDS) and 2013 UNAIDS estimates.
ART averted 4.2 million deaths in past decade

Annual number of people dying from AIDS-related causes in low- and middle-income countries globally compared with a scenario of no antiretroviral therapy, 1996–2012

The data points for 2012 are projected based on the scaling up of programmes in 2009–2011 and do not represent official estimates of the number of annual AIDS-related deaths.
When to start – ART Trends

Estimated millions of people eligible for ART in lower & middle-income countries in 2012

1. CD4 ≤ 200
   - Recommended until 2010

2. CD4 ≤ 350
   + TB/HIV
   + HBV/HIV
   - Recommended since 2010

3. CD4 ≤ 350
   + TB/HIV
   + HBV/HIV

4. CD4 ≤ 500
   + TB/HIV
   + HBV/HIV
   + SD couples
   + Pregnant
   + Children < 5

5. “Test and treat”
   - All HIV+

ART regardless of CD4 count for:
- HIV-SD couples
- Pregnant women
