Measles and Rubella Initiative Outbreak Response Fund

Standard Operating Procedure effective 01 June 2014

A. Introduction:

In June 2012, the GAVI Board approved 55 million US$ for measles outbreak response and other emerging measles needs in GAVI eligible countries. Measles outbreaks should be addressed through a comprehensive approach that aims to reduce morbidity and mortality by providing appropriate case management and vaccinating individuals at risk\(^1\). This document describes the standard operating procedures followed by the Measles and Rubella Initiative (M&RI) for the use of these funds.

B. Management and decision making

The M&RI core founding partners (Founding Partners)\(^2\) will be responsible for the management and decision making regarding the allocation of the outbreak response funds. The WHO headquarters, Expanded Programme for Immunization (HQ EPI) will provide secretariat support for reviewing funding requests and submitting these to the Founding Partners for decision on the use of outbreak response funds. In countries where MSF is present, a MSF representative should be invited by the WHO and UNICEF country offices to participate in the discussions to improve coordination of the response.

C. Eligibility for use of funds:

All GAVI eligible countries that have a significant measles outbreak of national public health importance AND cannot respond to the outbreak fast enough with in-country funding (domestic epidemic response funds or donor funding) are eligible to request funding for outbreak response.

As soon as a country decides to seek M&RI support, it is encouraged to notify M&RI of its intent to apply\(^3\) for the outbreak response fund indicating the approximate amount of support needed.

A formal request\(^4\) should follow the notification of intent to apply and consists of four documents:

1. A completed request form (Annex 2).
2. An investigation report of the outbreak and risk assessment of the potential for spread.
3. A plan of action describing the planned outbreak response activities which provides:
   - Identification of the target regions and size of target population;
   - Plans and budget for the proposed vaccination activities;
   - Plans for the evaluation of the outbreak response.
4. A cover letter demonstrating commitment from the Ministry of Health that it will provide or raise at least half of the operational costs in-country.

The Founding Partners will assess all requests for funding. Countries that fulfil the requirements will receive funding to cover bundled measles vaccine costs for selective and/or non-selective vaccination campaigns. In addition, the M&RI will fund a maximum of 50% of the generally accepted range of operational costs per targeted person. Case management and treatment costs will not be covered by the outbreak response funds. The balance of operational costs (at least 50%) would have to be borne by the government or raised in-country. The outbreak response funds will not provide funding support if in-country funding (donor or domestic) is available to cover all costs of the outbreak response.

D. Procedure to access the measles outbreak response fund:

1. The Ministry of Health of the affected country requests support for outbreak response through the WHO or UNICEF country offices. The WHO and UNICEF country offices immediately notify regional offices and WHO-HQ, by e-mail, of the country’s intent to seek funding using the format

---

\(^1\) For details on responding to outbreaks, please see “Response to measles outbreaks in measles mortality reduction settings” available at [http://whqlibdoc.who.int/hq/2009/WHO_IVB_09.03_eng.pdf](http://whqlibdoc.who.int/hq/2009/WHO_IVB_09.03_eng.pdf)

\(^2\) The core founding partners of the Measles and Rubella Initiative are ARC, CDC, UNF, UNICEF and WHO.

\(^3\) The advance notification of the Measles and Rubella Initiative are ARC, CDC, UNF, UNICEF and WHO.

\(^4\) The formal request should be made in the format found in Annex 2.
for advance notification\(^3\). HQ EPI should alert the M&RI management team of the country’s intent to apply for funding. This notification is informational only and no further action is needed.

2. The formal country request should follow. The Ministry of Health drafts the request in consultation with the WHO and UNICEF country offices\(^5\). The WHO and UNICEF country offices share the request with their regional offices immediately. In consultation with the Ministry of Health, the WHO and UNICEF country and regional offices should review and revise the country request for technical and operational appropriateness. The WHO and UNICEF country and regional offices should ensure that the completed requests are submitted to HQ EPI along with the WHO regional focal point’s recommendation for approval or disapproval within 7 working days after receipt of the advance notification.

3. HQ EPI processes the request and circulates it to the Founding Partners within 2 working days and requests a response within 2 working days.

4. Upon the Founding Partners’ decision to fund the request, HQ EPI alerts the WHO CO and the MOH. UNICEF PD immediately alerts UNICEF SD with all required information so that it can take steps to place orders for the vaccines and devices. UNICEF SD will prioritize supplies in consultation with the supply coordinating group in case of supply shortages.

5. The WHO and UNICEF headquarters transfer funds for operational costs to their country offices and funds for bundled vaccine costs to UNICEF SD, ensuring that the funds reach these offices within 7 working days after approval of the request.

6. The M&RI writes a formal letter to the Ministry of Health stating its decision to support the request and includes a clause to send an official report to M&RI within 3 months of the disbursement of funds to the country. A formal letter is sent by the M&RI even if a request is not funded.

7. The country MOH staff implements, evaluates and prepares a report on the outbreak response\(^6\). This report should be completed within 3 months of the disbursement of funds to the country and should be sent to the WHO and UNICEF regional offices and HQ EPI. The report will be shared immediately with the other partners.

The M&RI encourages countries to initiate immediate investigation and respond in a timely manner to outbreaks. The M&RI will not fund any request for funding that is made after the completion of an outbreak response.

At the end of each year, the Founding Partners will carefully evaluate the SOPs, fine tune them to allow for the most efficient and rapid deployment of outbreak response funds. Any changes to the SOPs will be communicated by the UNF to GAVI, with clear justifications, as part of the annual report to GAVI.

---

\(^3\) In most countries, the WHO country office will take the lead in sending the request. However, there might be circumstances where UNICEF takes the lead, and the request will be channeled through UNICEF country and regional office.

\(^5\) The report should be made in the format found in Annex 3.
The Measles and Rubella Initiative (M&RI) is a partnership between the United Nations Foundation, UNICEF, American Red Cross, Centers for Disease Control and Prevention (CDC) and WHO. The M&RI Outbreak Response Fund's objective is to ensure rapid and effective response to measles outbreaks by providing funding for vaccines, injection materials and operational costs. This advance notification does not, in any way, replace the need for a formal request as outlined in the standard operating procedure to access the M&RI outbreak response fund.

1. General information:
   
a) Date of sending this notification: _____/_____/_____ (dd/mm/yyyy)
b) Country: _____________________________________ (name of country)
c) Name, e-mail and telephone number of contact person at notifying agency ____________________________________________

2. Essential information:
   
a) Date of rash onset of first suspected case in the outbreak: _____/_____/_____ (dd/mm/yyyy)
b) Total number of outbreak associated suspected cases: _____________ (number)
c) Laboratory confirmation done: YES / NO (strike out whichever does not apply)
d) Total number of laboratory confirmed cases: _____________ (number)

3. Vaccination plan:
   
a) Size of the target population: ________________ (number)
b) Estimated cost for the requirement of vaccines and injection materials: USD__________
c) Estimated operational costs: USD__________
d) Will vaccination be done in one or multiple phases? ________________
e) Planned start date of vaccination: _____/_____/_____ (dd/mm/yyyy)
f) Planned end date of vaccination: _____/_____/_____ (dd/mm/yyyy)

---

7 This form should be sent by e-mail to HQ-EPI WHO (MRI-ORF@who.int) through either the WHO or UNICEF country and regional offices. In most countries, the WHO country office will take the lead in sending the advance notification. However, there might be circumstances where UNICEF takes the lead, and the request will be channelled through the UNICEF country and regional offices.

8 This form serves only as advance notification to the M&RI that a formal request to apply for M&RI outbreak response funding will follow (in the format in Annex 2 of the standard operating procedure to apply for M&RI outbreak response funding). It is obligatory to submit a complete report in the format outlined in Annex 3 of the standard operating procedure to apply for M&RI outbreak response funding within 3 months from the date of disbursement of funds.

9 If done in phases, the start and end dates of each phase should be mentioned in a separate note.
Measles and Rubella Initiative Outbreak Response Fund
Request Form\textsuperscript{10} to Access M\&RI Support\textsuperscript{11}

The Measles and Rubella Initiative (M\&RI) is a partnership between the United Nations Foundation, UNICEF, American Red Cross, Centers for Disease Control and Prevention (CDC) and WHO. The M\&RI Outbreak Response Fund's objective is to ensure rapid and effective response to measles outbreaks by providing funding for vaccines, injection materials and operational costs. This format is for a formal request to access the M\&RI outbreak response fund and follows the advance notification sent earlier as outlined in the standard operating procedure to access M\&RI outbreak response funds.

Please provide the following information:

1. This form, filled;
2. Investigation report;
3. Plan of action and budget; and

1. General information:
   a) Date of request: _____/_____/_____ (dd/mm/yyyy)
   b) Was advance notification sent earlier: YES / NO
      If "yes", date of advance notification: _____/_____/_____ (dd/mm/yyyy)
   c) Country: _____________________________________ (name of country)
   d) Name, e-mail and telephone number of contact person at requesting agency
      ________________________________________________________________
      ________________________________________________________________

2. An investigation report of the outbreak and risk assessment of the potential for spread, which includes:
   a) the country's routine immunization coverage of MCV1 (and MCV2 if applicable) for the last 5 years;
   b) the number of reported (suspected and laboratory confirmed) measles cases in the last 5 years, by age groups (0 – <1y; 1 – 4y; 5 – 9y; 10 – 14y; 15y and above);
   c) the number, geographic extent, target age group and coverage of SIAs done in the last 5 years;
   d) the date of commencement of the outbreak (an approximate date may be used if the exact date is unknown);
   e) the epi curve of the current outbreak showing the number of reported (suspected and laboratory confirmed) measles cases by day or week of rash onset;
   f) the spot map of the reported (suspected and laboratory confirmed) measles cases in the outbreak;
   g) the age distribution of the reported (suspected and laboratory confirmed) measles cases in the outbreak;
   h) an analysis of the probable causes of the outbreak; and
   i) a risk analysis of the districts in the country that indicates the potential for spread of the current outbreak.

\textsuperscript{10} This form should be sent by e-mail to HQ-EPI WHO (MRI-ORF@who.int) through either the WHO or UNICEF country and regional offices. In most countries, the WHO country office will take the lead in sending the request. However, there might be circumstances where UNICEF takes the lead, and the request will be channelled through UNICEF country and regional offices.
\textsuperscript{11} This form provides the format for a formal request to M\&RI outbreak response fund. It is obligatory to submit a complete report in the format in Annex 3 of the standard operating procedure for M\&RI outbreak response funding within 3 months from the date of disbursement of funds.
of outbreaks of measles in the last 5 years; and other threats like population movements, refugee influx, natural calamities etc.

3. **A plan of action and budget that describes the planned outbreak response activities, including:**

   a) Identification of the target regions and size of the target population. This should indicate the rationale for the age group and areas targeted;

   b) Plans for the proposed vaccination activities that provides the dates, manpower and training requirements, logistic details, vaccine and devices requirements, transport requirements, social mobilization and communication plans, AEFI management plans, waste disposal plans;

   c) Plans for the evaluation of the outbreak response including intra-campaign monitoring and post-campaign coverage survey. The costs for these activities should be included in the budget; and

   d) A detailed budget for the proposed vaccination activities that provides the breakdown of costs. The budget should break down the costs by age groups (under 5 years and 5 years and older), by activity and by contribution of each partner to each activity.

4. **A cover letter from the Ministry of Health** stating the government’s commitment to provide or raise at least half of the operational costs in-country.
Measles and Rubella Initiative Outbreak Response Fund
M&RI Support Reporting Form

The Measles and Rubella Initiative (M&RI) is a partnership between the United Nations Foundation, UNICEF, American Red Cross, Centers for Disease Control and Prevention (CDC) and WHO. The M&RI Outbreak Response Fund’s objective is to ensure rapid and effective response to measles outbreaks by providing funding for vaccines, injection materials and operational costs. This format is for the report on the use of M&RI outbreak response fund as outlined in the standard operating procedure to access M&RI outbreak response funds.

1. General information:
   a) Date of request: _____/_____/____ (dd/mm/yyyy)
   b) Date of receipt of funds from M&RI: _____/_____/____ (dd/mm/yyyy)
   c) Date of outbreak response: From _____/_____/____ (dd/mm/yyyy)  
      To _____/_____/____ (dd/mm/yyyy)
   d) Country: __________________________________________ (name of country)
   e) Reporting agency: Ministry of Health / WHO CO / UNICEF CO (tick whichever applies)
   f) Name, e-mail and telephone number of contact person at reporting agency

2. A report of the outbreak and the outbreak response, that contains:
   a) the geographical extent of the response (names of districts, cities/towns, map);
   b) the number of children targeted by age groups (0 – 4y; 5 – 9y; 10y and above);
   c) the age distribution of the reported (suspected and laboratory confirmed) measles cases (0 – <1y; 1 – 4y; 5 – 9y; 10 – 14y; 15y and above);
   d) the number and percentage of children immunized by age groups (0 – 4y; 5 – 9y; 10y and above);
   e) the epi curve of the current outbreak showing the number of the reported (suspected and laboratory confirmed) measles cases by day or week and indicating the dates of outbreak response;
   f) was a coverage evaluation done? YES / NO (strike out whichever does not apply);
   g) the results of the coverage evaluation survey (if done);
   h) an analysis of the probable causes of the outbreak; and
   i) a plan to avoid the causes of this outbreak in the future and plans for strengthening immunization systems.

3. A report on the funds received from M&RI for outbreak response activities which provides a detailed breakdown of the expenses incurred for the response activities, by activity and by contribution of each partner to each activity.

---

12 This form provides the format for reporting to the M&RI outbreak response fund. It is obligatory to submit a complete report in this format within 3 months from the date of disbursement of funds.
13 This form should be sent by e-mail to HQ-EPI WHO (MRI-ORF@who.int) through either the WHO or UNICEF country and regional offices. In most countries, the WHO country office will take the lead in sending the report. However, there might be circumstances where UNICEF takes the lead, and the report will be channelled through UNICEF country and regional offices.
