

Joint FAO/WHO Expert Committee on Food Additives (JECFA)
Roster of experts in biological sciences

This roster consists of scientific experts in biological sciences who have either submitted applications in response to the call for experts or are members of the Expert Panel on Food Safety. The applications were reviewed by an outside referee and by the WHO Joint Secretary of JECFA and selections were made on the basis of the criteria outlined in the call for experts. Members of the roster will be considered for future Expert Committee meetings and other activities relating to chemicals in food, but inclusion on the roster does not guarantee such participation. When making selections for individual meetings a balance of scientific expertise and geographical representation are considered. Both Members and Temporary Advisers are chosen from the roster.

The roster is dynamic. Experts are placed on it for an initial period of four years or until their terms on the Expert Panel on Food Safety expire, and new experts are added on the basis of consideration of new applications.
