The Use-Function Classification is used in two places in the INTOX Data Management System: the Communication Record and the Agent/Product Record. The two records are linked: if there is an agent record for a Centre Agent that is the subject of a call, the appropriate Intended Use-Function can be selected automatically in the Communication Record.

The Use-Function Classification is used when generating reports, both standard and customized, and for searching the case and agent databases. In particular, INTOX standard reports use the top level headings of the Intended Use-Functions that were selected for Centre Agents in the Communication Record (e.g. if an agent was classified as an Analgesic for Human Use in the Communication Record, it would be logged as a Pharmaceutical for Human Use in the report).

The Use-Function classification is very important for ensuring harmonized data collection.

In version 4.4 of the software, 5 new additions were made to the top levels of the classification provided with the system for the classification of organisms (items XIV to XVIII). This is a ‘convenience’ classification to facilitate searching of the Communications database. A taxonomic classification for organisms is provided within the INTOX DMS Agent Explorer.

In May/June 2006 INTOX users were surveyed to find out whether they had made any changes to the Use-Function Classification. These changes were then discussed at the 4th and 5th Meetings of INTOX Users.

Version 4.5 of the INTOX DMS includes the revised pesticides classification (shown in full below). Other revisions have not yet been incorporated into the electronic system and are marked with two asterisks.

**Sub-levels of the INTOX Use-Function Classification**

I. Pharmaceutical for Human Use *this is an adaptation of the ATC classification.*

Agent for Use on the Alimentary Tract or Metabolism
- Stomatological/mouth preparation; general  
  - Caries prophylactic agents**  
  - Anti-infectives & antiseptics for local oral treatment**  
  - Corticosteroids for local oral treatment**  
- Other agents for local oral treatment  
- Antacid; drug for treatment of peptic ulcer; antiflatulent  
- Antispasmodic/anticholinergic/propulsive  
- Antiemetic/anti-nauseant preparation  
- Bile/liver therapy  
- Laxative preparation  
- Antidiarrhoeal/intestinal anti-inflammatory/anti-infective agent  
- Antiobesity preparation (not diet product)  
- Digestive preparation  
- Drug used in diabetes  
- Vitamin supplement  
- Mineral supplement  
- Tonic preparation; medicinal  
- Anabolic agent; systemic  
- Appetite stimulant  
- Other agent for use on the alimentary tract or metabolism

Agent For Use On The Blood Or Blood Forming Organs
- Antithrombotic agent  
  - Vitamin K antagonists**

** revisions that have not yet been incorporated into the electronic system
○ Heparin group**
  ○ Platelet aggregation inhibitor excl. heparin**
  ○ Enzymes**
  ○ Direct thrombin inhibitors**
  ○ Other antithrombotic agents**
○ Antihemorrhagic drug
○ Antianaemic preparation
○ Serum lipid reducing agent
○ Plasma substitute/perfusion solution
○ Other agent for use on the blood or blood forming organs

Agent For Use On The Cardiovascular System
○ Drug for cardiac therapy
○ Antihypertensive
○ Diuretic
○ Peripheral vasodilator preparation
○ Vasoprotective
○ Beta-blocking agent; cardiovascular
○ Other agent for use on the cardiovascular system

Dermatological Agent
○ Antifungal; dermatological
○ Emollient or protective
○ Preparation for treatment of wounds or ulcers
○ Antipruritic preparation
○ Antipsoriatic preparation
○ Antibiotic/chemotherapeutic agent; dermatological
○ Antiseptic or disinfectant preparation
○ Medicated dressing preparation
○ Anti-acne preparation
○ Other dermatological agent

Agent Acting On The Genitourinary System/Sex Hormone
○ Gynaecological antiinfective or antiseptic
○ Sex hormone or modulator of the genital system
○ Urological preparation
○ Other agent acting on the genitourinary system/sex hormone

Systemic Hormonal Agent, Excluding Sex Hormone

General Antiinfective; Systemic
○ Antibacterial; systemic
○ Antimycotic preparation for systemic use (other than griseofulvin)
○ Antimycobacterial preparation
○ Antiviral; systemic
○ Immune serum/immunoglobulin
○ Vaccine
○ Other general antiinfective; systemic

Antineoplastic Or Immunosuppressive Agent
○ Cytostatic
○ Endocrine therapy; antineoplastic
○ Immunomodulating preparation

** revisions that have not yet been incorporated into the electronic system
- Immunosuppressive preparation
- Other antineoplastic or immunosuppressive agent

Agent Acting On The Musculoskeletal System
- Antiinflammatory or antirheumatic preparation
- Topical preparation for joint or muscular pain
- Muscle relaxant
- Antigout preparation
- Drug for treatment of bone disease
- Other agent acting on the musculoskeletal system

Agent Acting On The Nervous System
- Anaesthetic
  - Local anaesthetics**
  - General anaesthetics**
- Analgesic
  - Opioids**
  - Antimigraine medications**
  - Other analgesics and antipyretics**
  - Others**
- Antiepileptic preparation
  - Barbiturates**
  - Hydantoine derivatives**
  - Oxazolidine derivatives**
  - Benzodiazepines**
  - Carboxamide derivatives**
  - Fatty acid derivatives**
  - Other antiepileptics**
- Antiparkinsonian agent
  - Anticholinergic agents**
  - Dopaminergic agents**
- Psycholeptic agent
  - Antipsychotics**
  - Anxiolytics**
  - Hypnotics & sedatives**
  - Other***
- Psychoanaleptic agent
  - Antidepressants**
  - Psychostimulants**
  - Anti-dementia drugs**
- Other agent acting on the nervous system

Antiparasitic Agent
- Antiprotozoal preparation
- Anthelmintic agent
- Ectoparasiticide preparation, including scabicide
- Other antiparasitic agent

Agent Acting On The Respiratory System
- Nasal preparation
- Throat preparation
- Antiasthmatic preparation
- Cough/cold preparation

** revisions that have not yet been incorporated into the electronic system
Agent Acting On The Sensory Organs
- Ophthalmological preparation
- Otological preparation
- Other agent acting on the sensory organs

Miscellaneous Pharmaceutical Agent
- Allergen preparation; therapeutic
- Diagnostic agent
- General nutrient
- Other miscellaneous pharmaceutical agent

Other Pharmaceutical For Human Use

II. Pharmaceutical For Veterinary Use

Agent For Use On The Alimentary Tract Or Metabolism; Veterinary
- Stomatological preparation; veterinary
- Antacid or drug for treatment of peptic ulcer and flatulence; veterinary
- Antispasmodic or anticholinergic agent or propulsive; veterinary
- Antiemetic or antinauseant; veterinary
- Liver therapy; lipotropic; veterinary
- Laxative; veterinary; general
- Antidiarrhoeal or intestinal anti-inflammatory/antiinfective agent; veterinary
- Antiobesity preparation; excluding diet product; veterinary
- Digestive; including enzyme; veterinary
- Drug used in diabetes; veterinary
- Vitamin; veterinary
- Mineral supplement; veterinary
- Tonic; veterinary
- Anabolic agent for systemic use; veterinary
- Appetite stimulant; veterinary
- Other agent for use on the alimentary tract or metabolism; veterinary
