I. Epidemiological profile

Population 2013 %
High transmission (>1 case per 1000 population) 34,190,000 73
Low transmission (≤1 case per 1000 population) 12,980,000 27
Total malaria-free (0 cases) 60,000

Parasites and vectors
Major plasmodium species: P. falciparum (100%), P. vivax (9%)
Major anopholes species: An. gambiae, An. arabiensis, An. funestus

II. Intervention policies and strategies

Intervention Policies/strategies Yes/No Year adopted
ITN ITNs/LINs distributed free of charge Yes/– 2004
IRS IRS is recommended No/– 2010
Larval control Use of larval control recommended Yes/– 2009
PFT PFT used to prevent malaria during pregnancy Yes/– 2008
Diagnosis Patients of all ages should receive diagnostic test Yes/– 2011
Treatment ACT is free for all ages in public sector Yes/– 2009

III. Financing

Sources of financing

IV. Coverage

ITN and IRS coverage

V. Impact

Confirmed malaria cases per 1000 and ABER

Malaria admissions and deaths (per 100 000)
