I. Epidemiological profile

Population

- High transmission (≥1 case per 1000 population): 12,310,000
- Low transmission (0–1 cases per 1000 population): 0
- Malaria free (0 cases): 0
- Total: 12,310,000

II. Intervention policies and strategies

A. ITN
- ITNs/LINs distributed free of charge
- ITNs/LINs distributed to all age groups

B. IRS
- IRS is recommended
- IRS is authorized for IRS

C. Larval control
- Use of larval control recommended

D. IPT
- IPT used to prevent malaria during pregnancy

E. Diagnosis
- Patients of all ages should receive diagnostic test
- Malaria diagnosis is free of charge in the public sector

F. Treatment
- ACT is free for all ages in public sector
- Single dose of primaquine is used for gametocidal treatment
- G6PD test is a requirement before treatment with primaquine

G. Surveillance
- ACD for case investigation (reactive)

III. Financing

Sources of financing

- Government
- Global Fund
- World Bank
- USAID/PMI
- WHO/UNICEF
- Others

IV. Coverage

- With access to an ITN (model)
- At risk protected with IRS
- With access to an ITN (survey)

V. Impact

- Confirmed malaria cases per 1000 and ABER
- Malaria admissions and deaths

Impact: Insufficiently consistent data to assess trends
