I. Epidemiological profile

- Population: 27,200,000
- High transmission (>1 case per 1,000 population): 27,200,000
- Low transmission (0-1 cases per 1,000 population): 0
- Malaria free (0 cases): 0
- Total: 27,200,000

II. Intervention policies and strategies

- ITN: ITNs/LLINs distributed free of charge
- IRS: IRS is recommended
- Larval control: Use of larval control recommended
- IPT: P.f. used to prevent malaria during pregnancy
- Diagnosis: Patients of all ages should receive diagnostic test
- Treatment: ACTs for all ages in public sector
- Surveillence: ALD for case investigation (reactive)

III. Financing

- Sources of financing
  - Government
  - Global Fund
  - World Bank
  - USAID
  - WHO UNICEF
  - Others

IV. Coverage

- ITN and IRS coverage

V. Impact

- Confirmed malaria cases per 1000 and ABER

- Malaria admissions and deaths

Impact: Insufficiently consistent data to assess trends.
