Director-General, Department of Social Development

A private sector perspective
Ms Zanele Twala
Chief Executive Officer, The Standard Bank Tutuwa Community Foundation

Closing remarks
Mr Herve de Lys
Representative, UNICEF SA

Reception
Courtesy of Science Forum South Africa

Investing in early childhood development is essential to helping more children and communities thrive. 249 million children under five years in low and middle income countries are at risk of not reaching their developmental potential – yet low-cost interventions could reverse this trend.

The Lancet Series on Advancing Early Childhood Development: from Science to Scale was launched in Washington, DC on the 5th of October 2016. The South African launch is scheduled as a side event of the 2016 Science Forum South Africa in Pretoria.

The South African launch is supported by the ELMA Foundation, UNICEF, the DST Science Forum South Africa and the DST-NRF Centre of Excellence in Human Development at the University of the Witwatersrand.
