Antibiotic resistance happens when bacteria change and become resistant to the antibiotics used to treat the infections they cause.

**WHAT YOU CAN DO**

1. Only use antibiotics when **prescribed** by a certified health professional
2. Always take the **full prescription**, even if you feel better
3. Never use **left over** antibiotics
4. Never **share** antibiotics with others
5. Prevent **infections** by regularly washing your hands, avoiding contact with sick people and keeping your vaccinations up to date
