## Additional information and comments<sup>Δ</sup>:

Actualmente se tiene reglamentado y en fase de implementación el Programa Nacional de Tecnovigilancia post-mercado liderado por INVIMA (importantes para la gesion y manejo de los dispositivos médicos, también es importante dar normas sobre los productos importados, que son la mayoría). Otros temas relevantes son el de trazabilidad y manejo de los dispositivos médicos en el territorio nacional, al igual que lo relacionado con el manejo y aprobación de los equipos repotenciados, su control y uso (este mercado necesita formas alternativas de control, definir requisitos para su uso, etc.)
