* Density per 1,000,000 females aged from 50-69 old.

Additional information and comments:
Medical devices components such as tools, knowledge, skills, repair and maintenance are very crucial and essential. Therefore, Kiribati is fortunate to be part of this surveillance; thus, we maintain our QA/QI (quality assurance and quality improvement) to achieve MoH objectives (utilization of quality medical/nursing care to all Kiribati individuals). Patient/client to provide patient’s safety, quality health care services and patient satisfaction. We would appreciate to be advised on ongoing training especially for nurses.
