

GENERAL INFORMATION

The Democratic Republic of the Congo is a country with an approximate area of 2345 thousand square kilometers (UNO, 2008). The population is 67,827,495 and the sex ratio (men per hundred women) is 99 (UNO, 2009). The proportion of the population under the age of 18 years is 54% and the proportion above age 60 is 3% (UNO, 2009). The literacy rate is 69% for men and 62% for women (UN Statistics, 2008). The life expectancy at birth is 46 years for males and 49 years for females (UNO, 2005-2010). The healthy life expectancy at birth is 44 years for males and 49 years for females (UNPD, 2010). The country is in the low income group (based on 2010 World Bank criteria). The total expenditure on health as a percentage of gross domestic product is 2.04% and the per capita government expenditure on health (PPP int. \$) is \$4.0 (WHO, 2006). Suicide rate information is not available. In the Democratic Republic of the Congo, neuropsychiatric disorders are estimated to contribute to 4.7% of the global burden of disease (WHO, 2008).

GOVERNANCE

An officially approved mental health policy exists and was approved in 1999. Mental health is also specifically mentioned in the general health policy.

A mental health plan exists and was approved in 1999. The mental health plan components include:

- Timelines for the implementation of the mental health plan.
- Funding allocation for the implementation of half or more of the items in the mental health plan.
- Shift of services and resources from mental hospitals to community mental health facilities.
- Integration of mental health services into primary care.

Dedicated mental health legislation does not exist and legal provisions concerning mental health are not covered in other laws (e.g., welfare, disability, general health legislation etc.).

FINANCING

Mental health and mental hospital expenditures by the government health department/ministry are not available.

MENTAL HEALTH CARE DELIVERY

Primary Care

Prescription regulations authorize primary health care doctors to prescribe and/or to continue prescription of psychotherapeutic medicines but with restrictions. The department of health does not permit primary care nurses to prescribe and/or to continue prescription of psychotherapeutic medicines. Official policy does not permit primary health care nurses to independently diagnose and treat mental disorders within the primary care system.

The majority of primary health care doctors and nurses have not received official in-service training on mental health within the last five years. Officially approved manuals on the management and treatment of mental disorders are not available in the majority of primary health care clinics. Official referral

procedures for referring persons from primary care to secondary/tertiary care do not exist. Referral procedures from tertiary/secondary care to primary care also do not exist.

Mental Health Services

Availability of mental health facilities

	Total number of facilities/beds	Rate per 100,000 population	Number of facilities/beds reserved for children and adolescents only	Rate per 100,000 population
