

## GENERAL INFORMATION

Gabon is a country with an approximate area of 268 thousand square kilometers (UNO, 2008). The population is 1,501,266 and the sex ratio (men per hundred women) is 101 (UNO, 2009). The proportion of the population under the age of 18 years is 42% and the proportion above age 60 is 4% (UNO, 2009). The literacy rate is 98% for men and 96% for women (UN Statistics, 2008). The life expectancy at birth is 60 years for males and 62 years for females (UNO, 2005-2010). The healthy life expectancy at birth is 50 years for males and 62 years for females (UNPD, 2010). The country is in the Upper Middle income group (based on 2010 World Bank criteria). The total expenditure on health as a percentage of gross domestic product is 3.55% and the per capita government expenditure on health (PPP int. \$) is \$458.0 (WHO, 2006). Suicide rate information is not available. In Gabon, neuropsychiatric disorders are estimated to contribute to 7.8% of the global burden of disease (WHO, 2008).

## GOVERNANCE

An officially approved mental health policy doesn't exist. Mental health is specifically mentioned in the general health policy.

A mental health plan doesn't exist.

Dedicated mental health legislation does not exist. Legal provisions concerning mental health are not covered in other laws (e.g., welfare, disability, general health legislation etc.).

## FINANCING

Mental health expenditures by the government health department/ministry are less than 1% (0.62%) of the total health budget. Mental hospital expenditures are 100.0% of the total mental health budget.

## MENTAL HEALTH CARE DELIVERY

### Primary Care

Prescription regulations authorize primary health care doctors to prescribe and/or to continue prescription of psychotherapeutic medicines. In contrast, the department of health does not authorize primary health care nurses to prescribe and/or to continue prescription of psychotherapeutic medicines. Likewise, official policy does not permit primary health care nurses to independently diagnose and treat mental disorders within the primary care system.

The majority of primary health care doctors and nurses have not received official in-service training on mental health within the last five years. Officially approved manuals on the management and treatment of mental disorders are not available in the majority of primary health care clinics. Official referral procedures for referring persons from primary care to secondary/tertiary care do not exist, nor do referral procedures from tertiary/secondary care to primary care.

## Mental Health Services

### Availability of mental health facilities

	Total number of facilities/beds	Rate per 100,000 population	Number of facilities/beds reserved for children and adolescents only	Rate per 100,000 population
Mental health outpatient facilities	2	0.13	0	0.0
Day treatment facilities	0	0.0	0	0.0
Psychiatric beds in general hospitals	0	0.0	0	0.0
Community residential facilities	0	0.0	0	0.0
Beds/places in community residential facilities	0	0.0	0	0.0
Mental hospitals	1	0.07	0	0.0
Beds in mental hospitals	120	7.99	0	0.0

### Access to care

	Rates per 100,000 population)	Females (%)	Under age 18 (%)
