

## Niue

### GENERAL INFORMATION

Niue is a country with an approximate area of 0.03 thousand square kilometers (UNO, 2008) and a population of 1,438 (UNO, 2009). The proportion of the population under the age of 18 years is 68%. The proportion of the population above 60 is unknown. The healthy life expectancy at birth is 56 years for males and 68 years for females (UNPD, 2010). The total expenditure on health as a percentage of gross domestic product is 16.94% and the per capita government expenditure on health (PPP int. \$) is \$1243.0 (WHO, 2006). Suicide rate information is not available. In Niue, neuropsychiatric disorders are estimated to contribute to 16.8% of the global burden of disease (WHO, 2008).

### GOVERNANCE

An officially approved mental health policy does not exist. However, mental health is specifically mentioned in the general health policy.

A mental health plan does not exist.

Dedicated mental health legislation also does not exist. However, legal provisions concerning mental health are covered in other laws (e.g., welfare, disability, general health legislation etc.).

### FINANCING

Mental health and mental hospital expenditures by the government health department/ministry are not available.

### MENTAL HEALTH CARE DELIVERY

#### Primary Care

Prescription regulations authorize primary health care doctors to prescribe and/or to continue prescription of psychotherapeutic medicines. In contrast, the department of health does not authorize primary health care nurses to prescribe and/or to continue prescription of psychotherapeutic medicines. Similarly, official policy does not permit primary health care nurses to independently diagnose and treat mental disorders within the primary care system.

The majority of primary health care doctors and nurses have not received official in-service training on mental health within the last five years. Officially approved manuals on the management and treatment of mental disorders are available in the majority of primary health care clinics. Official referral procedures for referring persons from primary care to secondary/tertiary care exist, as do referral procedures from tertiary/secondary to primary care.

## Mental Health Services

### Availability of mental health facilities

	Total number of facilities/beds	Rate per 100,000 population	Number of facilities/beds reserved for children and adolescents only	Rate per 100,000 population
