

GENERAL INFORMATION

Zimbabwe is a country with an approximate area of 391 thousand square kilometers (UNO, 2008). The population is 12,644,041 and the sex ratio (men per hundred women) is 97 (UNO, 2009). The proportion of the population under the age of 18 years is 48% and the proportion above age 60 is 4% (UNO, 2009). The literacy rate is 98% for men and 99% for women (UN Statistics, 2008). The life expectancy at birth is 47 years for males and 45 years for females (UNO, 2005-2010). The healthy life expectancy at birth is 40 years for males and 45 years for females (UNPD, 2010). The country is in the Low income group (based on 2010 World Bank criteria). The total expenditure on health as a percentage of gross domestic product is not known and the per capita government expenditure on health (PPP int. \$) is \$0.0 (WHO, 2006). The suicide rate for males is 10.6 per 100, 000 population and for females is 5.2 per 100, 000 population. In Zimbabwe, neuropsychiatric disorders are estimated to contribute to 3.1% of the global burden of disease (WHO, 2008).

GOVERNANCE

An officially approved mental health policy exists and was approved or most recently revised in 2005. Mental health is specifically mentioned in the general health policy.

A mental health plan exists and was approved or most recently revised in 2009. The mental health plan components include:

- Timelines for the implementation of the mental health plan.
- Funding allocation for the implementation of half or more of the items in the mental health plan.
- Shift of services and resources from mental hospitals to community mental health facilities.
- Integration of mental health services into primary care.

Dedicated mental health legislation exists and it was initiated or most recently revised in 1996. Legal provisions concerning mental health are also covered in other laws (e.g., welfare, disability, general health legislation etc.).

FINANCING

Mental health expenditures by the government health department/ministry are 0.01% of the total health budget. Mental hospital expenditures are not available.

MENTAL HEALTH CARE DELIVERY

Primary Care

Prescription regulations authorize primary health care doctors to prescribe and/or to continue prescription of psychotherapeutic medicines. The department of health authorizes primary health care nurses to prescribe and/or to continue prescription of psychotherapeutic medicines but with restrictions. Official policy enables primary health care nurses to independently diagnose and treat mental disorders within the primary care system.

The majority of primary health care doctors and nurses have received official in-service training on mental health within the last five years. Officially approved manuals on the management and treatment of mental

disorders are available in the majority of primary health care clinics. Official referral procedures for referring persons from primary care to secondary/tertiary care exist, as do referral procedures from tertiary/secondary care to primary care.

Mental Health Services

Availability of mental health facilities

	Total number of facilities/beds	Rate per 100,000 population	Number of facilities/beds reserved for children and adolescents only	Rate per 100,000 population
