

Medical Eye Care		2003	
Item			
	CBM Ref. No.	Contents per unit	Unit Price (EUR)

Some general information on eye medicines

1. One ampoule of Lignocaine (50mls) should be sufficient for 5 -10 eye operations.
2. Steroids may cause blindness from glaucoma, cataract and corneal ulcer. They should only therefore be used when the diagnosis is sure and the indication for steroid treatment definite.
3. Because of poor compliance with medical therapy, surgical treatment rather than medical treatment is generally recommended for the majority of patients with chronic glaucoma.
4. Once opened an eye drop is only effective for one month from the date of opening.
5. Eye drops have a shorter shelf life than ointments, and, if possible, should be kept in a refrigerator between 2-8 degrees Celsius which doubles the shelf life.
6. Multivitamin is provided for the treatment of night blindness in women of child bearing age.
7. Vit A 200,000 IU must not be given to pregnant women.

Eye Medicine

Purchase by CBM/WEM: Eye Medicine List

Vitamin A Caps 200,000 IU	SL0001	500pcs	2.89
Occ.Tetracycline 1% - 5gm	DE0004	100pcs	10.37
Occ. Chloramphenicol 1% - 5gm	DE0005	100pcs	10.37
