To: the World Health Organization (WHO)

Re: Comments on the Montevideo Roadmap 2018-2030

Dear Sirs,

Please see below the World Stroke Organization’s (WSO) comments on the Montevideo Roadmap 2018-2030 on NCD’s.

- WSO is concerned with the vague and iterative wordings in the draft Declaration and the lack of concrete actions based on the knowledge that has been gained in implementing actions against the NCDs since the 2011 declaration.

- WSO recognizes that it is likely to be too late to change the Montevideo declaration into a technical WHO document

- WSO suggests that the declaration should include a statement on WHO to produce a technical document with technical specifications till the 2018 UN HLM

Yours Sincerely,

Prof. Werner Hacke
President
World Stroke Organization
