NATIONAL SYSTEMS RESPONSE

- Drug therapy to prevent heart attacks and strokes X
  - Proportion of population at high risk for CVD or with existing CVD (%)
  - Proportion of high risk persons receiving any drug therapy and counselling to prevent heart attacks and strokes (%)
  - Proportion of primary health care centres reported as offering CVD risk stratification
  - Reported having CVD guidelines that are utilized in at least 50% of health facilities
- Essential NCD medicines and basic technologies to treat major NCDs X
  - Number of essential NCD medicines reported as “generally available”
  - Number of essential NCD technologies reported as “generally available”

NO DATA AVAILABLE

- = no data available
- The mortality estimates for this country have a high degree of uncertainty because they are not based on any national NCD mortality data (see Explanatory Notes)
