**NATIONAL SYSTEMS RESPONSE**

- **Drug therapy to prevent heart attacks and strokes**
  - Proportion of population at high risk for CVD or with existing CVD (%): -
  - Proportion of high risk persons receiving any drug therapy and counselling to prevent heart attacks and strokes (%): -
  - Proportion of primary health care centres reported as offering CVD risk stratification: 2017 Don’t know

- **Essential NCD medicines and basic technologies to treat major NCDs**
  - Number of essential NCD medicines reported as “generally available”: 2017 7 out of 10
  - Number of essential NCD technologies reported as “generally available”: 2017 5 out of 6

---

*The mortality estimates for this country have a high degree of uncertainty because they are not based on any national NCD mortality data (see Explanatory Notes).*
