Central African Republic

Total population: 4,525,000
Income Group: Low

Percentage of population living in urban areas: 39.1%
Population proportion between ages 30 and 70 years: 28.6%

Premature mortality due to NCDs*
The probability of dying between ages 30 and 70 years from the 4 main NCDs is 18%.

Adult risk factors
- Current tobacco smoking (2011):
  - Males: ...
  - Females: ...
  - Total: ...
- Total alcohol per capita consumption, in litres of pure alcohol (2010):
  - Males: 5.7
  - Females: 1.9
  - Total: 3.8
- Raised blood pressure (2008):
  - Males: 34.3%
  - Females: 31.0%
  - Total: 32.6%
- Obesity (2008):
  - Males: 1.8%
  - Females: 5.1%
  - Total: 3.5%

National systems response to NCDs
- Has an operational NCD unit/branch or department within the Ministry of Health, or equivalent: No
- Has an operational multisectoral national policy, strategy or action plan that integrates several NCDs and shared risk factors: No
- Has an operational policy, strategy or action plan to reduce the harmful use of alcohol: No
- Has an operational policy, strategy or action plan to reduce physical inactivity and/or promote physical activity: No
- Has an operational policy, strategy or action plan to reduce the burden of tobacco use: DK
- Has an operational policy, strategy or action plan to reduce unhealthy diet and/or promote healthy diets: No
- Has evidence-based national guidelines/protocols/standards for the management of major NCDs through a primary care approach: No
- Has an NCD surveillance and monitoring system in place to enable reporting against the nine global NCD targets: No
- Has a national, population-based cancer registry: No

* The mortality estimates for this country have a high degree of uncertainty because they are not based on any national NCD mortality data (see Explanatory Notes).
DK = Country responded “don’t know”
... = no data available
