**Comoros**

Total population: 718,000  
Income Group: Low  
Population proportion between ages 30 and 70 years: 29.6%

### Age-standardized death rates*

![Graph showing age-standardized death rates](image)

### Proportional mortality (% of total deaths, all ages, both sexes)*

![Pie chart showing proportional mortality](image)

**Total deaths: 6,000**  
NCDs are estimated to account for 37% of total deaths.

### Premature mortality due to NCDs*

The probability of dying between ages 30 and 70 years from the 4 main NCDs is **23%**.

</table>

### National systems response to NCDs

- Has an operational NCD unit/branch or department within the Ministry of Health, or equivalent: **No**
- Has an operational multisectoral national policy, strategy or action plan that integrates several NCDs and shared risk factors: **No**
- Has an operational policy, strategy or action plan to reduce the harmful use of alcohol: **No**
- Has an operational policy, strategy or action plan to reduce physical inactivity and/or promote physical activity: **No**
- Has an operational policy, strategy or action plan to reduce the burden of tobacco use: **No**
- Has an operational policy, strategy or action plan to reduce unhealthy diet and/or promote healthy diets: **No**
- Has evidence-based national guidelines/protocols/standards for the management of major NCDs through a primary care approach: **No**
- Has an NCD surveillance and monitoring system in place to enable reporting against the nine global NCD targets: **No**
- Has a national, population-based cancer registry: **No**

* The mortality estimates for this country have a high degree of uncertainty because they are not based on any national NCD mortality data (see Explanatory Notes).
