Preface

The policy of the MoPH of Islamic republic of Afghanistan includes ensuring that the population of Afghanistan has access to safe, effective, and affordable medicines to treat its main health problems. The Essential Drugs List contains the medicines needed for adequately addressing the priority health problems defined in the MoPH's Health Strategy. The Licensed Drugs List contains all the medicines listed in the EDL, with the addition of second or third choice alternatives and medicines for conditions not included as priorities in the present strategy.

A second version of the LDL was developed in 2004 and published in 2005. The rapid pace of expansion of basic health services in Afghanistan since 2002, the changing internationally recommended treatment protocols for some diseases (e.g. malaria, TB, diarrhoea...) and the presence of new emergent diseases (e.g. HIV, ...) urged the MoPH to revise and adapt both the existing EDL and LDL. Previously EDL and LDL had been developed separately, and the unavoidable discrepancies between the final documents created confusion with some users. Therefore, the MoPH decided to entrust the revision of both documents to one committee, thus minimizing possible future discrepancies.

The LLD/EDL review committee also drafted the detailed procedures for inclusion of new medicines in the LDL and EDL, guidelines for adequate use of the lists and initiated the development of a database for tracking the updates and edits in the LDL/EDL. The procedures will facilitate the mechanism of inclusion new drug in LDL under logic and comprehensive methods, this procedure concentrate to the specific format which guarantees the inclusion of new drug by a scientific & transparent way.

I would like to express its appreciation to the members of the LDL/EDL review committee, who oversaw and managed the complicated process of updating the lists. The MoPH is also grateful to the many Afghan and international organizations and individuals who provided assistance and support in the process. We are especially grateful for the sustained technical and financial assistance of the United States Agency for International Development thought the Technical Support to the Central and Provincial Ministry of Public Health (Tech-Serve), implemented by Management Sciences for Health, and of the World Health Organization, Eastern Mediterranean Regional Office, which allowed the successful revision, publication and distribution of the updated Licensed Drugs List of Afghanistan.

The MoPH warmly recommends its partners in the public health and those in the private sector dealing with pharmaceuticals, be it in production, importation or distribution of medicines, to use the LDL list as official reference. It will facilitate the task of all those working with pharmaceuticals in Afghanistan, and improve their collaboration with the MoPH to reach its goals and objectives of providing quality health services to the people of Afghanistan.

Introduction

1. Short history

In 2003, the MOPH published a National Essential Drug List (EDL) and in 2005 a Licensed Drugs List (LDL) for Afghanistan.

The LDL contains all medicines that can be imported and sold in Afghanistan, under their International Non-proprietary Name (INN). The LDL contains all the drugs listed in the EDL, and hence contains all the drugs recommended for use in the BPH, EPHS and the MoPH’s national programs. It also contains dispensary products and products used in dentistry. It is used as guideline by the authorities granting import licenses for drugs used in the public and private sector.

Given the quick development and expansion of the health service delivery system in Afghanistan since 2003, including the development of new treatment protocols and updated WHO recommendations for several diseases, the need for updating both lists became adamant. The MOPH constituted a Review Committee in May 2007, consisting of clinical and pharmaceutical experts from the MOPH, major hospitals, teaching institutes, international agencies, NGOs, and the private sector. Between May and December 2007, the committee met regularly, and individual committee members took responsibility for the in-depth revision of certain parts of the LDL with sub-committees, enlarging the consultative process to an even larger group of experts from the different MOPH task forces, training institutes, NGOs and international organizations. Late October 2007, a draft was presented in a 2 day workshop, attended by over 200 participants including senators of the Afghan parliament, provincial health directorates, pharmacy and medical specialists, provincial pharmacy officers, and representatives of NGOs working in health and of the private sector. The draft was scrutinized and finalized through intensive group work.

2. Objectives of 2007 Update

The main objectives of the review process in 2007 were:
1. To achieve complete consistency between the BPHS-EPHS-EDL-LDL documents based on a rational selection of essential drugs.
2. Elaborate clear Terms of Reference for the Pharmaceutical Review Committee, not only for this exercise, but also for revisions in the future
3. Define a detailed and transparent review process that can be used for future revisions.
4. Define detailed and transparent procedures to control possible exceptions to the EDL and LDL with administrative and budgetary methods. Similar procedures should apply to requests for deletion, or addition of a product that is on the EDL or LDL

3. Transparent review process

Under guidance and supervision of the DG Pharmacy, the Review Committee adhered to a transparent review process in all stages of the revision, in order to allow future reference to the decisions made:
1. clear definition of what documents need to be produced by the process, in this case, the EDL and LDL, and clear procedures for inclusion of new drugs in the lists;
2. agreement on the Working Principles: how to manage the Review Task force and the inclusive consultation of interested parties/stakeholders, without creating a slow and
cumbersome process. Realistic deadlines for different stages in the review process were set.

3. Definition of the reference works that should guide the review process:
   • The existing LDL;
   • The WHO Model List of Essential Medicines (MLEM) as a main guide on efficacy, safety and quality;
   • The Afghan BPHS/EPHS documents;
   • Recently updated treatment recommendations from MOPH departments and programs;
   • Product lists of recognized international suppliers are a good guide to evaluate availability and cost;
   • British National Formulary and Martindale were used as references where the above documents failed to provide enough information

4. Define specific selection criteria for inclusion in the EDL and LDL
   • Drugs listed on the WHO MLEM, can be included to ensure efficacy, safety and quality;
   • All drugs listed in the BPHS/EPHS should be included;
   • Drugs recommended in standard treatment protocols should be included;
   • Included drugs should be available in Afghanistan to ensure availability;
   • Included drugs should be available from recognized international suppliers which ensures availability and affordable cost;
   • Drugs already donated by international donors should be included which ensures availability and affordable cost for certain essential drugs;
   • Avoid combinations of active substances, except when recommended by WHO
   • Avoid exclusive presentations, corresponding with only one or a very limited number of branded products.

4. Classifications of drugs

Most countries classify drugs in therapeutic groups. After considering several options, the Committee decided to adapt the Anatomo Therapeutical Chemical (ATC) classification, promoted by the WHO Collaborating Centre for Drug Statistics Methodology, which is itself adapted from classification system developed by the European Pharmaceutical Market Research Association (EPhMRA) and the Pharmaceutical Business Intelligence and Research Group (PBIRG).

The classification allows to group drugs in several categories, according to the organ or system on which they act and their chemical, pharmacological and therapeutic properties. Five different levels are used. The drugs are divided into fourteen main groups (1st level), with one pharmacological/therapeutic subgroup (2nd level). The 3rd and 4th levels are chemical/pharmacological/therapeutic subgroups and the 5th level is the chemical substance. The 2nd, 3rd and 4th levels are often used to identify pharmacological subgroups when that is considered more appropriate than therapeutic or chemical subgroups. For example, Amoxicillin is classified as follows:

J   Anti-infective for systemic use (main group)
J01  Antibacterials for systemic use (therapeutic subgroup)
J01C Beta-Lactam Antibacterials, Penicillins (chemical subgroup)
J01CA Penicillins with extended spectrum (chemical subgroup)
J01CA01 Ampicillin (chemical substance)

Thus each chemical substance in the LDL has its 7-digit ATC code. This implies that the same substance listed under different administrations forms or presentations will have the same ATC code. The ATC code is not a unique identifier for each individual drug included in the LDL.

Where it exists, the International Non-proprietary Name (INN) is used for the chemical substance. When this is not available, either the United States Adopted Name (USAN) or the British Approved Name (BAN) is chosen.

The ATC classification was chosen because it contains also Defined Daily Doses for many of the products listed; it will facilitate studies on consumption of medicines in Afghanistan; it will allow comparing studies on Afghanistan’s pharmaceutical system with other countries; and it also has an equivalent classification system for herbal medicines and veterinary products. It is also flexible enough to allow temporary classification of a group of products, until a specific code is found.

The ATC classification is updated regularly by WHO. The MOPH decided to use the January 2007 version, and has adapted the system for use in Afghanistan. The adapted ATC is available from the MOPH on request. The MOPH will not annually update the ATC classification used in Afghanistan, but most likely do a 5-yearly update.

5. Procedures for inclusion of new products

The committee drafted detailed instructions for updating and including new products in the LDL. The request form and detailed user guides are given in Annex 1

6. Computerization

The GD Pharmacy will track updates and changes in the LDL through a database. Presently the database contains all the generic names of the drugs contained in the LDL, including recent deletions. Of each drug the following information is tracked:

Classification code based on the WHO ATC classification, version of January 2007.
International non-proprietary name, strength and presentation, to the extend possible matching the name used in the WHO ATC classification;
Alternate generic name under which the drug is used in Afghanistan;
Modal international indicator price, where available;
Indication whether the drug is included in the Essential Drugs List of Afghanistan;
Indication whether the drug is this presentation and strength is used in BPHS and/or EPHS;
Indication whether the drug is on the controlled substances list of Afghanistan, is available without prescription, is included in a special program of the MOPH (which may entail restriction in importation and use), and is included in the Model List of Essential Medicine of WHO.

Tracking the medicines through a database allows easy production of customized listings for different purposes, and also storing historical data on products no longer used. This database

Version of 15 December 2007
module may become the core of a more extended database, when the MOPH starts computerizing all registered drugs in Afghanistan.

7. Different listings in the LDL

The LDL contains an ATC listing of chemical substances licensed for use in Afghanistan (see: LDL – ATC Classification). Chemical substances are listed with details, only indicating whether they are also used in the EDL, or a special program of the MOPH. If a substance is used for different therapeutic purposes, that substance will be listed under each corresponding group, with a different ATC code. In the LDL – ATC Classification, items or listed up to the 3rd level only. More detailed classification was deemed needlessly cumbersome.

The listing called LDL-Alphabetical Classification, contains all the individual drugs corresponding with the list in the LDL – ATC Classification. This listing contains for each active chemical substance: the name and the strength. It also indicates the route of administration and the most common unit of administration (e.g. tablet, 5ml, etc…). Some drugs also contain the packing size. Between brackets, the commonly used alternate names are listed (e.g. Aspirin for Acetylsalicylic acid), as well as internationally used abbreviations (eg. ASA for Acetylsalicylic acid). Between square brackets ([]), it includes the complete ATC Code for the drug, thus facilitating cross-reference to the LDL-ATC Classification. Between exclamation marks (!) it indicates when the drug is used in the EDL. Finally, between asterisks (*) it gives the name of the special program list the drug is used in.

The Controlled Substances list contains all the medicines that are on the list of controlled substances of the Ministry of Counter Narcotics. These medicines need a special import license from the Drug Regulatory Committee, and need to be stored and tracked separately from the other medicines.

The Dispensary List and the Dental List give a summary of items used for dispensary purposes and dentistry purposes respectively.

The Over-the-Counter (OTC) list contains the medicines that can be sold/bought without prescription.

The Special Programs lists contain medicine that are used in special programs run by the MOPH. Some of the medicine is subject to special considerations for distribution and use. Instructions are given for each list.

8. Detailed instructions for use of the LDL

1. The EDL contains all items allowable for importation and commercialization in the public sector. The LDL contains all chemical therapeutic substances allowable in Afghanistan, they are listed by INN. For each item identified many brands exist and may qualify for importation and commercialization in Afghanistan. Each patent name (or brand or specialty or propriety name) needs a certificate before it can be used in Afghanistan. The first condition to obtain such certificate is that the active substance should correspond with an item listed in the LDL: INN name, presentation and strength. Before granting a certificate, the MOPH will further require sufficient proof of adequate quality control
measures as under the “WHO Certification Scheme on the Quality of Pharmaceutical Products moving in International Commerce” (the Scheme), and any other required procedures according to the Afghan laws currently in effect. Likewise, individual batches of imported medicines will need sufficient documentation according to the Scheme, and may be subject to additional quality control testing by the MOPH.

2. Several drugs are listed for use only in special programs (e.g. opium tincture for substance abuse program, antiretroviral drugs for HIV program, misoprostol for post partum hemorrhage program, …). They can only be imported with special permission of the GD Pharmacy and the concerned MOPH program.

3. The following presentation forms are interchangeable, meaning that if one is mentioned, the others are allowable as well:
   a. Tablets and capsules for oral administration tab-cap. Retard or sustained release tablets/capsules are not interchangeable with normal tablets/capsules.
   b. Creams and ointment and gel for topical administration:
   c. Solution and syrup and suspension and powder for oral administration. They are not interchangeable with oral tablets-capsules.
   d. Solution and powder for injectable solution. Aqueous and oily solutions are not interchangeable. Normal injections and retard, sustained release or long-acting injections are not interchangeable.

Examples:
Amoxicillin 250 mg capsule is listed; Amoxicillin 250 mg tablet is accepted as well
Bacitracin ointment is listed, Bacitracin cream is accepted as well

NOTE: if an oral form is listed, this does not mean that a topical or injectable form is accepted.

4. If the volume of a bottle or the weight of a container or tube is mentioned, they will often correspond to a full treatment of the most common patient population using that drug. The explicitly mentioned volume and weight are minimal limits, i.e. smaller containers will not be accepted, but larger containers are acceptable.

Examples:
Cotrimoxazole oral suspension 50ml is listed: cotrimoxazole 40ml is not acceptable, cotrimoxazole 60 ml or 100ml is acceptable

5. Vitamins are included in a two different sections:
   a. Individual vitamins and minerals are listed in the main list, with exact specifications. Most often these preparations are used for therapeutic purposes.
   b. Multivitamins with or without minerals are allowable, as long as the concentration of each active substance per unit dose (tablet, ml, 5ml, ..) falls within the limits for Supplement Daily Intake listed in the Reference Table for Vitamins and Minerals Supplements. Most often these preparations are used as dietary supplements.

6. Oral Rehydration Salts are listed in two forms: 20.5gr per liter and 27.9gr per liter. The 20.5gr per liter solution is recommended by WHO, and likewise by the MOPH. However, the 27.9gr per liter was formerly recommended and is still widely available. It will remain allowable in Afghanistan till December 2009.

Composition of ORS 20.5gr/liter:

| anhydrous glucose | C6H12O6 | 13.5g |

Version of 15 December 2007
potassium chloride  KCl  1.5g
sodium chloride  NaCl  2.6g
trisodium citrate dihydrate  C6H5Na3O7,2H2O  2.9g

Composition of ORS 27.9gr per liter:

Glucose  20g
potassium chloride  1.5g
sodium chloride  3.5g
trisodium citrate dihydrate  2.9g

9. Where to obtain copies and updates of the LDL

Printed copies of this version can be obtained from the MOPH/GD Pharmacy/API/Essential Drugs Department in Kabul. Contact person is Ms. Aisha Noorzayee, mobile phone: 070061337.

Copies on CD of updated version can be obtained at the same address through the same contact person.

Updated versions will also be available on the website of the MOPH: www.moph.gov.af.

Version of 15 December 2007
Warfarin

**B02- ANTIHEMORRHAGICS**

**B02A- ANTIFIBRINOLYTICS**

Aprotinin
Tranexamic acid

**B02B- VITAMIN K AND OTHER HEMOSTATICS**

Coagulation factor II, VII, IX, X ! EDL !
Coagulation factor II, VII, X
Coagulation factor IX
Coagulation factor VIII ! EDL !
Phytomenadione (Vit K) ! EDL !

**B03- ANTIANEMIC PREPARATIONS**

**B03A- IRON PREPARATIONS**

Ferrous gluconate
Ferrous sulfate (strength in Fe equivalent) ! EDL !
Ferrous sulfate (strength in Fe equivalent) + Folic acid ! EDL !
Ferrous sulfate + Vitamin B12 + Ascorbic acid + Folic acid
Iron dextran ! EDL !
Iron sorbitol

**B03B- VITAMIN B12 AND FOLIC ACID**

Cyanocobalamine (VitB12)
Folic acid (Vit B9) ! EDL !
Hydroxocobalamine (Vit B12) ! EDL !
Mecobalamine (Vit B12)

**B03X- OTHER ANTIANEMIC PREPARATIONS**

Erythropoietin alfa
Erythropoietin beta

**B05- BLOOD SUBSTITUTE AND PERFUSION SOLUTIONS**

**B05A- BLOOD AND RELATED PRODUCTS**

Albumin (Human)
Dextran 70 ! EDL !
Plasma substitute
Polygeline

**B05B- I.V. SOLUTIONS**

Amino acid 10%
Amino acid 5%
Amino acid balanced
Glucose ! EDL !
Glucose + Sodium chloride ! EDL !
Mannitol ! EDL !
Ringer lactate (Compound Sodium Lactate Solution) ! EDL !
Sodium chloride ! EDL !

**B05C- IRRIGATING SOLUTIONS**

Glucose ! EDL !
Sodium bicarbonate ! EDL !
Sodium citrate * See: Dispensary List *

**B05D- PERITONEAL DIALYTICS**

Isotonic ! EDL !

Version of 15 December 2007
Hypertonic

B05X- I.V. SOLUTION ADDITIVES
Potassium chloride ! EDL ! * See: Dispensary List *

B06- OTHER HEMATOLOGICAL AGENTS
Chymotripsin

C- CARDIOVASCULAR SYSTEM

C01- CARDIAC THERAPY
C01A- CARDIAC GLYCOSIDES
Digitoxin
Digoxin ! EDL !

C01B- ANTIARRHYTHMICS, CLASS I AND III
Amiodarone
Bretylium tosilate
Lidocaine ! EDL !
Procainamide ! EDL !

C01C- CARDIAC STIMULANTS EXCL. CARDIAC GLYCOSIDES
Dobutamine
Dopamine ! EDL !
Epinephrine (Adrenaline) ! EDL !
Isoprenaline (Isoproterenol)
Norepinephrine

C01D- VASODILATORS USED IN CARDIAC DISEASES
Glyceryl trinitrate (Nitroglycerine) ! EDL !
Isosorbide dinitrate ! EDL !
Isosorbide mononitrate

C01E- OTHER CARDIAC PREPARATIONS
Adenosine
Candesartan + Hydrochlorthiazide

C02- ANTIHYPERTENSIVES
C02A- ANTIADRENERGIC AGENTS, CENTRALLY ACTING
Clonidine
Methyldopa ! EDL !

C02C- ANTIADRENERGIC AGENTS, PERIPHERALLY ACTING
Doxazosin
Prazosin

C02D- ARTERIOLAR SMOOTH MUSCLE, AGENTS ACTING ON
Diazoxide
Hydralazine ! EDL !
Nitroprusside sodium

Version of 15 December 2007
C03- DIURETICS
C03A- LOW-CEILING DIURETICS, THIAZIDES
Chlorothiazide
Hydrochlorothiazide ! EDL !

C03B- LOW-CEILING DIURETICS, EXCL. THIAZIDES
Chlortalidone
Metolazone

C03C- HIGH-CEILING DIURETICS
Furosemide ! EDL !
Torasemide

C03D- POTASSIUM-SPARING AGENTS
Spironolactone ! EDL !

C03E- DIURETICS AND POTASSIUM-SPARING AGENTS IN COMBINATION
Amiloride + Hydrochlorothiazide
Spironolactone + Furosemide
Triamterene + Hydrochlorothiazide

C04- PERIPHERAL VASODILATORS
C04A- PERIPHERAL VASODILATORS
Ergoloid mesylates (Co-d ergocrine mesylate)
Isoxsuprine
Xantinol nicotinate

C05- VASOPROTECTIVES
C05A- ANTIHEMORRHOIDALS FOR TOPICAL USE
Lidocaine + Hydrocortisone acetate + Aluminium subacetate + Zinc oxide
Lidocaine + Hydrocortisone acetate + Aluminium subacetate + Zinc oxide (Anti-hemorrhoidal)

C05B- ANTIVARICOSE THERAPY
Heparinoid
Heparinoid + Hyaluronidase

C07- BETA BLOCKING AGENTS
C07A- BETA BLOCKING AGENTS
Atenolol ! EDL !
Bisoprolol
Carvedilol
Esmolol ! EDL !
Labetalol
Metoprolol
Propranolol ! EDL !
Sotalol
Timolol

C08- CALCIUM CHANNEL BLOCKERS
C08C- SELECTIVE CALCIUM CHANNEL BLOCKERS WITH MAINLY VASCULAR EFFECTS
Amlodipine ! EDL !
Nifedipine slow release ! EDL !
Nimodipine

Version of 15 December 2007
C08D- SELECTIVE CALCIUM CHANNEL BLOCKERS WITH DIRECT CARDIAC EFFECTS
Diltiazem
Verapamil ! EDL !

C09- AGENTS ACTING ON THE RENIN-ANGIOTENSIN SYSTEM
C09A- ACE INHIBITORS, PLAIN
Captopril ! EDL !
Enalapril ! EDL !
Lisinopril
Quinapril
Ramipril

C09B- ACE INHIBITORS, COMBINATIONS
Captopril + Hydrochlorothiazide
Lisinopril + Hydrochlorothiazide

C09C- ANGIOTENSIN II ANTAGONISTS, PLAIN
Candesartan
Irbesartan
Losartan
Valsartan

C09D- ANGIOTENSIN II ANTAGONISTS, COMBINATIONS
Losartan + Hydrochlorothiazide

C10- LIPID MODIFYING AGENTS
C10A- LIPID MODIFYING AGENTS, PLAIN
Atorvastatin
Clofibrate ! EDL !
Colestyramine ! EDL !
Fluvastatin
Gemfibrozil
Lovastatin
Nicotinic acid
Simvastatin ! EDL !

D- DERMATOLOGICALS

D01- ANTFUNGALS FOR DERMATOLOGICAL USE
D01A- ANTFUNGALS FOR TOPICAL USE
Clotrimazole
Crystal Violet * See: Dispensary List *
Isoconazole
Isoconazole + Diflucortolone
Ketoconazole ! EDL !
Methyrosaniline (Gentian Violet) ! EDL !
Miconazole
Nystatin ! EDL !
Salicylic acid ! EDL !
Selenium sulfide
Terbinafine ! EDL !
D01B- ANTIFUNGALS FOR SYSTEMIC USE
Griseofulvin ! EDL !
Terbinafine ! EDL !

D02- EMOLLIENTS AND PROTECTIVES
D02A- EMOLLIENTS AND PROTECTIVES
Methylsalicylate
Paraffin wax, soft + Paraffin liquid * See: Dispensary List *
Retinol + Colecalciferol
Zinc oxide ! EDL ! * See: Dispensary List *

D03- PREPARATIONS FOR TREATMENT OF WOUNDS AND ULCERS
D03A- CICATRIZANTS
Cod liver oil + Zinc Oxide

D03B- ENZYMES
Seratipeptidase

D04- ANTIPRURITICS, INCL. ANTIHISTAMINES, ANESTHETICS, ETC.
Benzocaine
Calamine (ZnO + Fe2O3) ! EDL ! * See: Dispensary List *
Calamine (ZnO + Fe2O3) + Diphenhydramine
Capsaicin
Doxepin
Lidocaine ! EDL !
Methylsalicylate * See: Dispensary List *
Methylsalicylate + Menthol

D05- ANTIPSORIATICS
D05A- ANTIPSORIATICS FOR TOPICAL USE
Coal tar ! EDL !
Dithranol (anthraline, cignoline)
Ethacridine lactate
Ichthyol
Methoxsalen

D05B- ANTIPSORIATICS FOR SYSTEMIC USE
Methoxsalen

D06- ANTIBIOTICS AND CHEMOTHERAPEUTICS FOR DERMATOLOGICAL USE
D06A- ANTIBIOTICS FOR TOPICAL USE
Fusidic acid
Mupirocin ! EDL !
Neomycin + Bacitracin ! EDL !
Neomycin sulfate
Polymyxin + Bacitracin
Tetracycline

D06B- CHEMOTHERAPEUTICS FOR TOPICAL USE
Metronidazole ! EDL !
Silver sulfadiazine ! EDL !

D07- CORTICOSTEROIDS, DERMATOLOGICAL PREPARATIONS
D07A- CORTICOSTEROIDS, PLAIN
Betamethasone
Betamethasone dipropionate
Betamethasone sodium
Betamethasone valerate
Clobetasol
Dexamethasone
Diflucortolone
Fluocinolone
Hydrocortison acetate ! EDL !
Triamcinolone

D07B- CORTICOSTEROIDS, COMBINATIONS WITH ANTISEPTICS
Betamethasone + Fusidic acid

D07C- CORTICOSTEROIDS, COMBINATIONS WITH ANTIBIOTICS
Betamethasone + Clotrimazole
Betamethasone + Neomycine ! EDL !
Dexamethasone + Clotrimazole
Gentamicin sulfate + Hydrocortisone acetate
Hydrocortisone + Gentamycine
Triamcinolone + Neomycine + Nystatine

D08- ANTISEPTICS AND DISINFEKTANTS
Benzalkoniun
Boric acid glycerine ! EDL !
Chlorhexidine digluconate ! EDL !
Chlorhexidine gluconate + Cetrimide ! EDL !
Chloroxylenol
Choline salicylate + Cetalkonium chloride + Ethanol
Ethanol
Hydrogen peroxide ! EDL ! * See: Dispensary List *
Iodine * See: Dispensary List *
Mercurochrome * See: Dispensary List *
Nitrofurural (nitrofurazon)
Potassium permanganate ! EDL ! * See: Dispensary List *
Povidone-iodine ! EDL !
Sodium hypochlorite ! EDL !

D10- ANTI-ACNE PREPARATIONS
D10A- ANTI-ACNE PREPARATIONS FOR TOPICAL USE
Azelaic acid
Benzoyl Peroxide ! EDL !
Clindamycine
Isotretioin
Precipitated sulfur * See: Dispensary List *
Sulfur
Sulfur + Salicylic acid ! EDL !
Tretinoin

D11- OTHER DERMATOLOGICAL PREPARATIONS
Diclofenac
Minoxidil
Tacrolimus

G- GENITO URINARY SYSTEM AND SEX HORMONES

Version of 15 December 2007
G01- GYNECOLOGICAL ANTIINFECTIVES AND ANTISEPTICS
G01A- ANTIINFECTIVES AND ANTISEPTICS, EXCL. COMBINATIONS
Clindamycin
Clotrimazole
Furazolidone ! EDL !
Isoconazole
Metronidazole + Nystatin
Miconazole
Nystatin ! EDL !
Povidone-iodine
Terbinafine

G02- OTHER GYNECOLOGICALS
G02A- OXYTOCICS
Dinoprostone * See: National Post Partum Hemorrhage program List *
Ergometrine maleate ! EDL !
Methylergometrine maleate
Methylergometrine maleate ! EDL !
Misoprostol * See: National Post Partum Hemorrhage program List *

G02B- CONTRACEPTIVES FOR TOPICAL USE
Condom w/wo nonoxinol ! EDL ! * See: National Family Planning Program List *
Intrauterine device with copper ! EDL ! * See: National Family Planning Program List *

G02C- OTHER GYNECOLOGICALS
Bromocriptine
Nifedipine ! EDL !
Ritodrine

G03- SEX HORMONES AND MODULATORS OF THE GENITAL SYSTEM
G03A- HORMONAL CONTRACEPTIVES FOR SYSTEMIC USE
Ethinylestradiol + Levonorgestrel ! EDL ! * See: National Family Planning Program List *
Ethinylestradiol + Norethisterone ! EDL ! * See: National Family Planning Program List *
Ethinylestradiol + Norgestrel ! EDL ! * See: National Family Planning Program List *
Medroxyprogesterone acetate Depot ! EDL ! * See: National Family Planning Program List *
Norgestrel ! EDL ! * See: National Family Planning Program List *

G03B- ANDROGENS
Testosterone
Testosterone enantate

G03C- ESTROGENS
Estradiol
Estradiol maleate
Estradiol valerate
Ethinylestradiol ! EDL !

G03D- PROGESTOGENS
Hydroxyprogesterone
Norethisteron
Progestrone

G03G- GONADOTROPINS AND OTHER OVULATION STIMULANTS
Clomifene ! EDL !
Gonadotropin

Version of 15 December 2007
G03H- ANTIANDROGENS
Cyproterone + Ethynilestradiol
Cyproterone acetate

G04- UROLOGICALS
G04B- OTHER UROLOGICALS, INCL. ANTIISPASMODICS
FlavoxatePinene 310mg + Camphene 150mg + Cineol B.P.C 30mg + Fenchone 40mg + Borneol 100mg +Anethol USP 40mg + Olive Oil BP 330mg
Pinene 31mg + Camphene 15mg + Cineol B.P.C 3mg + Fenchone 4mg + Borneol 10mg +Anethol USP 4mg + Olive Oil BP 33mg
Sildenafil
Vardenafil

G04C- DRUGS USED IN BENIGN PROSTATIC HYPERTROPHY
Finasteride
Tamsulosin
Terazosin

H- SYSTEMIC HORMONAL PREPARATIONS, EXCL. SEX HORMONES AND INSULINS

H01- PITUITARY AND HYPOTHALAMIC HORMONES AND ANALOGUES
H01B- POSTERIOR PITUITARY LOBE HORMONES
Anti Diuretic Hormone (Vasopressine) (ADH)
Desmopressin
Oxytocine ! EDL !

H01C- HYPOTHALAMIC HORMONES
Octreotide

H02- CORTICOSTEROIDS FOR SYSTEMIC USE
H02A- CORTICOSTEROIDS FOR SYSTEMIC USE, PLAIN
Betamethasone
Dexamethasone
Fludrocortisone
Hydrocortisone acetate
Hydrocortisone sodium succinate ! EDL !
Methylprednisolone
Prednisolone ! EDL !
Triamcinolone

H03- THYROID THERAPY
H03A- THYROID PREPARATIONS
Levothyroxine ! EDL !

H03B- ANTITHYROID PREPARATIONS
Carbimazole ! EDL !
Methimazole
Propylthiouracil
Thiamazole (Methimazole)

H03C- IODINE THERAPY
Iodine ! EDL !

Version of 15 December 2007
Iodine (oil) ! EDL !
Iodine + Potassium iodide (Lugol (Iodine 130mg/ml))

H04- PANCREATIC HORMONES
H04A- GLYCOGENOLYTIC HORMONES
Glucagon

H05- CALCIUM HOMEOSTASIS
H05A- PARATHYROID HORMONES AND ANALOGUES
Parathyroid hormone

H05B- ANTI-PARATHYROID AGENTS
Calcitonine

J- ANTIINFECTIVES FOR SYSTEMIC USE

J01- ANTIBACTERIALS FOR SYSTEMIC USE
J01A- TETRACYCLINES
Doxycycline ! EDL !
Minocycline
Oxytetracycline

J01B- AMPHENICOLS
Chloramphenicol ! EDL !

J01C- BETA-LACTAM ANTIBACTERIALS, PENICILLINS
Amoxicillin ! EDL !
Amoxicillin + Clavulanic acid (Co-amoxiclav) ! EDL !
Ampicillin ! EDL !
Ampicillin + Cloxacillin
Carbenicillin
Cloxacillin ! EDL !
Nafcillin
Penicillin Benzyl (Peni G) ! EDL !
Penicillin Benzyl + Penicillin procaine ! EDL !
Penicillin Benzyl Benzathine ! EDL !
Penicillin benzyl Procaine ! EDL !
Penicillin V (Phenoxy methyl Penicillin) ! EDL !

J01D- OTHER BETA-LACTAM ANTIBACTERIALS
Cefaclor
Cefadroxil
Cefalexin
Cefazolin
Cefepime
Cefixime
Cefotaxime
Cefradine
Ceftazidime
Ceftriaxone ! EDL !
Cefuroxime
Imipenem + Cilastatin

J01E- SULFONAMIDES AND TRIMETHOPRIM

Version of 15 December 2007
Sulfadiazine
Sulfamethoxazole + Trimethoprim (Cotrimoxazole) \* EDL !

**J01F- MACROLIDES, LINCOSAMIDES AND STREPTOGRAMINS**
Azithromycin
Clarithromycin
Clindamycin
Erythromycin (Base) \* EDL !
Erythromycin stearate \* EDL !

ANNEX 1: 
Procedure for Application for Inclusion of Medicines on the Licensed Drugs List of the Ministry of Public Health of Afghanistan

A. General

The Licensed Drugs List selection process is based upon a well-developed procedure that ensures transparency of the licensing process.

Applications for inclusion in the list will only be considered the application form has been fully completed for each proposed drug. There is one application form to be filled out for each proposed drug. In summary, the necessary information required before an application will be considered is as follows:

1. The applicant’s contact details are complete;
2. The drug’s international non-propriety name (INN) has been stated, including strength, route of administration, and presentation;
3. The indications have been clearly stated;
4. The details of the proposed regimen for each indication are clearly stated;
5. All relevant comparator drugs presently included in the LDL have been listed for each indication;
6. There is sufficient evidence to support the proposed amendment.

B. Types of applications

Applications may address major or minor amendments.

Minor amendments include, but are not limited to:

1. new strengths, presentations or administration forms of drugs already included in the LDL
   E.g. proposing the inhalator form of a bronchodilator that is already included as tablet and/or injection
   E.g. slow-release tablets instead of common tablets
2. combination therapies of drugs already included in the LDL

For minor amendments the required supporting evidence should be relevant to the nature of the amendment, and include cost implications.
E.g. alignment with new WHO recommendations on strengths or combination therapies requires only a copy of the new WHO recommendations.

Major amendments include, but are not limited to:

1. new indications for existing items on the list
   E.g. using a drug included for its anti-hypertension properties as a tocolytic
2. new therapeutic entities

1 The same format is used for proposing deletions from the list. Often the proposal for inclusion of one drug will also indicate the drug to be replaced with that drug. The drug to be replaced will be deleted. If an existing drug should be deleted without replacement, the same format can be used, indicating the drug to be deleted in Section 4 without however proposing a new drug for replacement in Section 3, but mentioning “to be removed” in Section 3.
E.g. a new antibiotic (doxycycline) to replace a previously included one (tetracycline) for the same indication.

3. new therapeutic classes
   E.g. anti-retroviral drugs

All major amendments must be supported by evidence reflecting safety, efficacy and cost of the medicine compared to an already listed drug for the same indication. This usually is one of more article(s) from an unbiased source of globally recognized integrity. A major amendment may also include motivations for drugs not listed and for conditions not yet addressed by the drugs included in the LDL. In such cases, submissions must be supported by demographic/epidemiologic data.

C. Submittal and screening process

Applications are submitted to the GD Pharmacy of the MOPH. Upon receipt, the GD will acknowledge the receipt of the application in writing.

Applications are screened by the Technical Subcommittee (TSC) of the National Essential Drugs List Committee (NEDLC) at the GD Pharmacy at the MOPH to ensure that:

1. the applicant’s contact details are included
2. the drug can be identified in terms of the INN (generic name)
3. at least one indication has been included, with the proposed regimen
4. relevant comparator drug(s) ha(s)(ve) been identified with their corresponding dosing regimen
5. there are supporting references to substantiate the application

TSC will compile a review of the prevailing cost of therapy and allocates the application to a suitably qualified reviewer who compiles a technical report. This technical report summarizes a review of the submitted data and supporting references in terms of the following:

1. relative safety – are side-effects acceptable considering the benefits for the patient having the indicated condition
2. relative efficacy – compare treatment results with treatment results of existing drugs for the stated condition
3. practice environment – the focus here being efficacy relative to current LDL drugs
4. pharmaco-economic evaluation – compare the full treatment cost of the proposed drug with the full treatment cost of existing drugs

The report is then presented to the technical subcommittee. The committee may request further information from the applicant before recommending a decision to the NEDLC.

The technical subcommittee will make recommendations to the NEDLC for approval or rejection. Where the NEDLC is of the opinion that a further review is required, the decision will be sent back to the technical subcommittee for further review.

Where the NEDLC is of the opinion that the drug is acceptable, the recommendation for approval will be submitted to the National Medicine Board.

Where the NEDLC is of the opinion that the drug is not acceptable, the applicant will be informed of the rejection and of the reasons for rejection. A rejected drug will not be reconsidered for inclusion within six months of the rejection. Resubmission requires significant additional information and supporting references that address the specific reason(s) for rejection of the original application.

D. Detailed description of the data elements of the application form <name>, no. <number>

The application submission form is divided into 5 sections.

Section 1: Proposed Drug Identification
a) **Proposed Drug**: The International Nonproprietary Name (INN) of the medicine – this identifies a pharmaceutical substance or active pharmaceutical ingredient by a unique name that is globally recognized and is public property. A nonproprietary name is also known as a generic name. It also includes the presentation form and the strength of the proposed medicine. E.g. Acetylsalicylic acid, tablet, 325 mg.

b) **Level of Care** - indicate whether the proposed medicine should be included in the BPHS, indicating the specific level(s), and/or the EPHS, also indicating the specific level(s). If intended for use by a special program, or specialist MD, indicate the program or MD in the **Special** case.

c) **Submission date** – the Shamsi calendar date on which the submission is filled out.

### Section 2: Applicant’s Details

The NEDLC will acknowledge all submissions and communicate decisions with supporting arguments where appropriate. This section therefore forms a vital link between the applicant and the decision making process.

a) **Title** – Mr, Mrs, Dr, Pr, etc.…. 

b) **Name** – full name of the applicant. Do not abbreviate: Mohammad, but not Mhd.; Sayyed, but not S.; etc…

c) **Father’s Name** - full name of the applicant’s father. Do not abbreviate: Mohammad, but not Mhd.; Sayyed, but not S.; etc…

d) **Postal address** – full address where correspondence regarding the application should be sent: house #, street name, village of city *nahia*, district and province

e) **Phone** – Phone number(s) on which the applicant can be contacted.

f) **E-mail** – email address where correspondence regarding the application can be sent

g) **Facility ID** – if applicable, the official MOPH facility code of the facility where the applicant works. If the applicant is a private practitioner, working in a non-registered facility, put “NA” for this entry.

### Section 3: Proposed Indications

For each drug submitted for inclusion, at least one indication with proposed regimen needs to be filled out. Up to three indications can be filled out for one drug submitted for inclusion.

a) **Indication** – the applicant can list up to 3 indications (conditions) for using the suggested drug. Points to consider:

   i. Where the applicant suggests a new therapeutic class, i.e. a new or emerging disease/condition, a brief motivation based upon Afghan epidemiological data, as well as inclusion status in BPHS/EPHS must be included as an annexure.

   ii. The indication should allow for the identification of the appropriate comparator(s) in the current LDL.

   iii. Many drugs have multiple indications. However, not all indications are equally cost effective.

b) **Proposed Treatment Regimen:**

   - **Dose** – the amount of the drug to be given with each intake/administration
   - **Route** – oral, parenteral, topical, etc…
   - **Interval** – expressed as one administration every so many hours
   - **Days** – number of days for a full treatment. For chronic conditions, write “30”

The above data will be used for cost comparison and is very important for the pharmaco-economic evaluation of the application.

c) **Cost assessment**
Costs are expressed in USD – only this currency should be used. Using USD may facilitate comparisons with drugs available on the international market. The cost assessment of the proposed drug is filled out by the applicant and will be double-checked by the TSC.

- **Cost/Unit** – the cost for one unit of the drug. Clearly indicate the unit for which the cost is given.
- **Cost/Day** – the cost for one day of treatment with the drug.
- **Cost/Course** – the cost for a complete treatment, or for one month’s treatment for drugs used in chronic conditions.

The above information is necessary for the determination of affordability. The LDL includes all drugs that are included in the EDL. Drugs on the LDL are commonly prescribed in the private sector, which creates a demand and an implicit expectation that they may be considered for inclusion in the EDL. For this reason, pharmaco-economic data is considered mandatory before deciding to include a drug in the LDL.

d) **Level of evidence**

Indicate for each indication the level of evidence that supports the use of the proposed drug for that indication. The numbers used to indicate the different levels of evidence, in decreasing importance, are:

- **Ia Meta-analysis**: this type of study combines the results of several studies that address a set of related research hypotheses into one study. Ideally should combine results from randomized controlled trials.
- **Ib Randomized controlled trial (RCT)**: the patients are randomly allocated to receive either a standard accepted therapeutic or preventive regimen, or an experimental regimen. The purpose of random allocation is to eliminate or minimize bias in the selection of subjects. This greatly enhances the validity of the results. Preferably, the subjects and those observing the trial's results should be unaware of which subjects are receiving the experimental and control regimens. The RCT is one of the simplest and most powerful tools in clinical research. Ethical considerations limit the routine application of RCT to all new medicine.
- **II Controlled study with no randomization**: a quantitative, comparative, controlled experiment in which the investigators study two or more interventions in a series of individuals, but without randomization of assigning the intervention. The lack of randomization makes evidence from these trials less convincing than the evidence from a RCT.
- **III Comparative, correlation or case-control study**: can be retro-active or prospective (cohort-study). Basically cases are added as they appear (or as they are found in records), and then a comparison is made between those that followed different therapies. Less convincing evidence, but particularly useful for more rare conditions.
- **IV Expert committee**: expert committees are convened at national or international level to make recommendations on state-of-the-art treatments of diseases. An expert committee formulates an opinion or recommendation, which will be as convincing as the evidence used by the committee to come to that opinion or recommendation.
- **V Clinical experience**: the least convincing evidence, clinical experience can be more or less systematically collected.

Section 4: Drugs on the current LDL for the same indication

As a principle, the addition of an LDL item should replace an existing item. This is of particular importance when safety and economic implications are taken into account. For each indication, the applicant will give at least one comparator drug. For new therapeutic classes, this is not required. Details of the comparator drug include:

- **a) Drug** – INN (generic name), presentation form and strength.
- **b) Indication** – cite (one of) the indication(s) listed in Section 3.
- **b) Current treatment regimen** – like for the proposed drug.
- **c) Cost assessment** – the cost assessment of the comparator drugs is done by the TSC.
e) **Can be replaced by the proposed drug** – the TSC’s conclusion of the comparison between current drug and the proposed drug (Yes/No)

Section 5: Pharmacy Department Only

This section is intended to ensure that the submissions follow the proper process. Dates of steps/decisions will be noted as appropriate. The section will allow the interested parties to quickly review the history of an application.

a) **Correspondence**
   - **Date received** – date on which the application was received
   - **Date acknowledged** – date on which a message was sent to the initiator confirming receipt
   - **Application for additional evidence** – if applicable, date on which a request for more evidence was sent to the applicant. Only one request for more evidence will be sent per application for inclusion. Failure to submit convincing evidence will lead to rejection of the application for inclusion.
   - **Number of articles submitted initially** – the number of articles submitted along with the application
   - **Number of articles submitted as additional evidence** – the number of articles submitted after application for additional evidence

b) **Advice of TSC** – if “Accept” or “Reject”

c) **Reason for application** – summarizes the reason(s) for the application. More than one option may be circled:
   - **New drug** - this is an application for a new drug which is not yet on the LDL
   - **New strength-presentation form** – this is an application for a new strength or presentation form of a drug already included in the LDL
   - **New or changed condition** – this is an application to extend the use of an existing drug to a condition for which it was previously not used, or the condition it was previously accepted for has been changed (e.g. split in two or more new conditions)
   - **Change in STG** – this an application provoked by a change in Standard Treatment Guidelines or official MOPH protocols
   - **New therapeutic class** – this is an application for new drugs that address newly emergent conditions (e.g. HIV/AIDS drugs).

c) **Rejected by NEDLC** – date on which NEDLC rejected the application

d) **Forward to NMB** - date on which NEDLC forwarded the application for final acceptance

e) **Accepted by NMB** - date on which NMB accepted the drug for inclusion

f) **Rejected by NMB** - date on which NMB rejected the drug for inclusion

e) **Signature and stamp of DG Pharmacy** - (president of NEDLC) and stamp

f) **Signatures and stamp** - signatures of members of the NMB

The applicant will be informed in writing of the final decision.

Notes:

1. **Evidence**
Evidence is a vital component of the submission and review process. Evidence does not constitute a drug decision and merely informs the strength of the argument. It forms the basis upon which the decision is made and allows for transparent scrutiny of the decision as well as facilitating the review. Evidence is required in support of:
   - *relative efficacy*
   - *relative safety*
   - *pharmacoeconomic benefits*

Evidence needs to be relevant to the Afghan context. Multinational or foreign studies must be supported by a motivation of the relevance of both the outcome measures as well as socio-economic facets to the Afghan context. The inclusion of at least one relevant reference is mandatory.

For application of an existing drug to a new indication, or introduction of a new drug or new class of drugs, a copy of the full journal article should be included in order to expedite the review process.

2. **Communication of decision**
After processing, the decision regarding an application will be communicated in writing to the initiator. In case of rejection of the application, the exact reasons for rejection will be mentioned.

3. **Reconsidering a rejected application**
As a rule, a rejected application will not be reconsidered within six months after the rejection. To qualify for reconsideration, compelling additional evidence (see note 1) should accompany the resubmission.
