ADVOCACY & COMMUNICATIONS TOOLKIT

Towards the UNITED NATIONS HIGH-LEVEL MEETING ON THE FIGHT TO END TUBERCULOSIS 26 SEPTEMBER 2018, UNHQ, NEW YORK

WE WILL #EndTB  www.who.int/UNHLMonTB/
Tuberculosis (TB) is the leading infectious killer worldwide and one of the top ten causes of deaths. Every day, over 4300 people die from TB and nearly 30 000 people fall ill with this disease. This preventable and curable disease is deeply rooted in communities “left behind” – where poverty is pervasive and human rights and dignity are limited. The devastating social and economic impact on people affected and their families is profound. Drug-resistant TB is the most common and lethal airborne antimicrobial resistant disease in the world today and a global health security threat, with over 0.5 million people affected in 2017.

Although 54 million lives have been saved since 2000, the pace of progress is slow and actions and investments fall far short of those needed to end the TB epidemic.

Around the world, the challenges associated with TB diagnosis and treatment are attributed to economic, social and physical factors limiting access to care. TB patients often suffer from social exclusion, lack of egalitarian participation in society and lack of trust. These factors have dimensions that extend well beyond the health sector, calling for a multisectoral response.

Urgent accelerated and concerted actions across all sectors of society are needed now.
The United Nations General Assembly will hold a high-level meeting on 26 September 2018 on the fight against tuberculosis (TB) for the very first time. The theme of the meeting is “United to end Tuberculosis: an urgent global response to a global epidemic”. The UN high-level meeting on TB is a tremendous and unprecedented step forward by governments and all partners engaged in the fight against TB. It follows on from a very successful Ministerial Conference on Ending TB in Moscow on 16-17 November, 2017 which resulted in high-level commitments from nearly 120 countries and 800 participants to accelerate the End TBs as expressed in the Moscow Declaration to End TB.
WHO IS THIS TOOLKIT FOR?

This communications toolkit contains practical guidance and essential information and has been compiled by WHO to amplify key TB messages in the lead-up to and during the high-level meeting. **This toolkit is for you** - whether you work for the government, a nongovernmental organization, the civil society, the academia or a media outlet, whether you are a doctor, teacher, journalist, blogger or simply someone who would like to get involved. We hope that the information contained in this toolkit is useful to your work. We look forward to receiving your suggestions and inputs to improve it further.

COMMUNICATIONS OBJECTIVES

- Raise awareness and engage public discussion on the importance of ending TB in the lead up to the UN high-level meeting;
- Create a conversation on ending TB that will extend far beyond the UN General Assembly;
- Build an understanding of the importance of multisectoral engagement and action as imperative to defeating TB;
- Promote examples of good multisectoral engagement leading to improvements in conditions for ending TB;
- Build platforms and momentum to lead from the UN high-level meeting in 2018 to encourage concerted and urgent action by all stakeholders and leadership.

OVERARCHING MESSAGES

1. TB is the leading infectious disease killer worldwide today, and among the top ten causes of death. It carries profound economic and social consequences;
2. Ending the TB epidemic by 2030 is a key health target of the UN Sustainable Development Goals and the WHO end TB Strategy;
3. Current actions and investments by countries fall short of what is needed to end TB;
4. Ending TB requires concerted action by all sectors to provide the right services, support and enabling safe environment in the right place, at the right time;
5. Everyone has a role to play in ending TB – individuals, communities, businesses, governments, societies.
6. Progress on TB is a contributor to, and an indicator of, sustainable development (SDG tracer);
7. Everyone with TB should have access to rapid diagnosis, treatment and care. This is a matter of social justice, fundamental to WHO’s goal of universal health coverage;
8. Ending TB is a moral imperative and makes economic sense; for every US$1 invested to end TB, US$43 is returned as the benefits of a healthy functioning society. (Economist/Copenhagen Consensus)

HOW CAN YOU GET INVOLVED?

Below are some materials you can use in your communications channels (website, social media, etc) to promote the High Level Meeting. Please let us know if you require additional material.

http://www.who.int/UNHLMonTB/
The United Nations high-level meeting follows a very successful Global Ministerial Conference on Ending TB (Moscow, 16-17 November 2017) which resulted in high-level commitments from nearly 120 countries and 800 partners to accelerate the End TB response as expressed in the Moscow Declaration to End TB.

The UN high-level meeting will consist of an opening segment, a plenary segment of the World Health Organization and the Stop TB Partnership. It is working closely with the office of the President of the General Assembly, of the World Health Organization (WHO) in organizing the meeting. WHO will be leading the meeting process, with the support of the United Nations General Assembly. The resolution on the meeting requests the President of the General Assembly, with the support of top leadership from the UN and partners including Heads of State and Government; Ministers of Health and of other sectors such as finance, social development, justice, labour; Nongovernmental organizations, including faith-based organizations, civil societies representatives, affected people and communities; Academic and research institutions; Philanthropic foundations; Private sector entities.

The agenda of the meeting will focus on the following areas:

- A multibectoral accountability framework
- Ensuring and strengthening implementation and innovation
- Sufficient and sustainable funding
- Expanding access to care
- Ensuring diagnostic capacity
- Ending the stigma and discrimination surrounding TB
- Developing and expanding human resource capacities
- Ensuring that high levels of quality care are achieved across the high-level meeting process

The high-level meeting will be preceded by an interactive civil society hearing on 4 June 2018. With over 150 participants from all sectors, the hearing was held at the Barbuda. Japan and Antigua & Barbuda hosted a high-level meeting process for the very first time.

The United Nations General Assembly will hold a high-level meeting on Ending TB (Moscow, 16-17 November 2017) which resulted in high-level commitments from nearly 120 countries and 800 partners to accelerate the End TB response as expressed in the Moscow Declaration to End TB.

The UN high-level meeting will follow a very successful Global Ministerial Conference on Ending TB (Moscow, 16-17 November 2017) which resulted in high-level commitments from nearly 120 countries and 800 partners to accelerate the End TB response as expressed in the Moscow Declaration to End TB.

Top 5 facts on TB: Instagram video
**MEDIA RESOURCES**

**Infographic**

**TB IS THE TOP INFECTIOUS KILLER IN THE WORLD**

1.6 MILLION PEOPLE DIED FROM TB IN 2017

Including 300,000 people with HIV

TB is the leading killer of people with HIV and a major cause of deaths linked to antimicrobial resistance.

**REACHING ALL PEOPLE WITH TB WITH QUALITY CARE**

10 MILLION PEOPLE FELL ILL WITH TB IN 2017

6.4 MILLION PEOPLE WERE OFFICIALLY RECORDED BY NATIONAL REPORTING SYSTEMS

3.6 MILLION PEOPLE WERE UNDIAGNOSED, OR DETECTED BUT NOT REPORTED

Better reporting, diagnosis and access to care will close this gap.

**TACKLING THE MDR-TB CRISIS**

ONLY ONE IN FOUR PEOPLE HAD ACCESS TO MDR-TB TREATMENT

Of those treated only 55% were treated successfully.

**EXPANDING ACCESS TO TB PREVENTIVE TREATMENT**

ONLY 36% OF PEOPLE WHO STARTED ON TB PREVENTIVE TREATMENT WERE ENROLLED IN HIV CARE.

ONLY 23% OF CHILDREN UNDER 5 YEARS OLD RECEIVED TB PREVENTIVE TREATMENT.

**FUNDING GAPS IMPEDE PROGRESS TO END TB**

US$10.4 BILLION REQUIRED FOR TB IMPLEMENTATION VERSUS $3.7 BILLION INVESTED

US$2 BILLION REQUIRED FOR TB RESEARCH VERSUS $1.3 BILLION INVESTED

**TREATMENT OF TB INFECTION (LATENT TB)**

US$10.4 BILLION ARE NEEDED TO TREAT 10-15% OF THE POPULATION WHO WILL GO ON TO DEVELOP TB DISEASE.

**PRIORITY RISK GROUPS**

- CHILDREN CONTACTS UNDER 5 YEARS OLD RECEIVING ORG. OR HAEMATOLOGICAL TRANSPLANTATION
- PEOPLE LIVING WITH HIV RECEIVING DIALYSIS OR ANTI-TNF TREATMENT
- PEOPLE WITH SILICOSIS

**FUNDING GAP**

US$3.5 BILLION TO REACH ALL PEOPLE WITH TB.

US$1.3 BILLION TO REACH PEOPLE WITH MDR-TB.

**CONTACTS**

- CHILDREN CONTACTS UNDER 5 YEARS OLD RECEIVING ORG. OR HAEMATOLOGICAL TRANSPLANTATION
- PEOPLE LIVING WITH HIV RECEIVING DIALYSIS OR ANTI-TNF TREATMENT
- PEOPLE WITH SILICOSIS

**SETTING/CONTEXT**

- 1/4 of the global population is infected with latent tuberculosis.
- 10-15% will go on to develop TB disease.
In the lead up and during the conference we will be communicating via our social media channels:

SUGGESTED TWEETS

- Tuberculosis is an airborne disease caused by bacteria. TB is contagious, but curable and preventable #EndTB
  - Link to download Instagram video on Top 5 facts on TB: https://www.dropbox.com/sh/3r8n6d3u1dl01yk/AABKtDliSI1_VuCbQ2UxuXqIa?dl=0

- #TB claims 4,000 lives each day, 120,000 lives every month and 1,600,000 lives annually. Every year TB kills more people than HIV. #EndTB

- Fewer people fell ill and died from tuberculosis last year but countries are still not doing enough to end TB by 2030. #TB remains the world’s deadliest infectious disease. WHO calls for urgent action to #EndTB: http://bit.ly/2PJNtz8

- Underreporting & under-diagnosis of #TB cases remains a major challenge. In 2017, an estimated 3.6m people with #TB were undiagnosed, or detected but not reported. This gap is bigger for children. We need to urgently close gaps in care #EWCisme #EndTB

- Globally, an estimated 10 million people developed tuberculosis in 2017, including 3.2 million women and 1 million children. We need political momentum to end #TB deaths & suffering #EWCisme http://bit.ly/2PJNtza

- The progress that has been made in combating #TB has been hard won and must be intensified if we are to wipe out the TB global epidemic. Listen to the video message from @WHO Director-General @DrTedros on Ending #TB in lead up to #UNHLMonTB https://youtu.be/Ywpwr73qjl #EndTB

- Current action & investments are falling short of what is needed to end the global TB epidemic. We urgently need to fill gaps for #TB implementation & research #EndTB #UNHLMonTB

- Ending TB is moral imperative & makes economic sense; for every US$1 invested US$43 is returned as benefits of healthy society #EndTB

- The UN High Level Meeting will bring together Heads of State on 26 September at the UN in New York. Historic moment with hope for groundbreaking commitments

- UN HIGH-LEVEL MEETING ON TB: the power of multisectoral action can do more to accelerate global & national #TB responses

FACEBOOK POST
On 26 September 2018, Heads of State from across the world will meet at the UN High-Level Meeting on TB in New York for the first time to ramp up the fight against TB and take forward the Moscow declaration to End TB.
