**WHO GLOBAL TB REPORT 2016**

Actions and investments to end TB fall far short

Tuberculosis among top 10 causes of death worldwide last year

**Here are the statistics from 2015**

10.4 million people **FELL ILL FROM TB**

That’s 28,500 people every day

60% of TB cases worldwide occurred in just **SIX COUNTRIES**

China, India, Indonesia, Nigeria, Pakistan, South Africa

More action and investment in these countries will drive down the TB burden

1.8 million people **DIED FROM TB** including 400,000 **WITH HIV + TB**

That’s over 4,900 people every day

3 million **LIVES WERE SAVED BY THE GLOBAL TB RESPONSE IN 2015**

- **ACCESS TO CARE**
  - 6.1 million people had access to quality TB care
  - 4.3 million people missed out

Better reporting, diagnosis and access to care will close this gap

- **DRUG RESISTANCE**
  - Only 1 in 5 people needing treatment for multidrug-resistant TB in 2015 actually received it
  - Only half of those who started MDR-TB treatment were cured

Better detection, prevention and cure will address the crisis of multidrug-resistant TB

**GLOBAL TARGETS**

- **90% reduction in TB deaths** compared to 2015
- **80% reduction in TB cases**

*World Health Assembly and United Nations Sustainable Development Goals

But reaching these targets will be an uphill battle

**ANNUAL GLOBAL FINANCING FOR TB NEARLY US$3BN SHORT**

All data for 2015

- Numbers are estimations

WHO GLOBAL TB REPORT 2016

- Tuberculosis among top 10 causes of death worldwide last year

- Actions and investments to end TB fall far short

- More action and investment in these countries will drive down the TB burden

- 10.4 million people fell ill from TB

- 6.1 million people had access to quality TB care

- 4.3 million people missed out

- 1.8 million people died from TB including 400,000 with HIV + TB

- 3 million lives were saved by the global TB response in 2015

- Global targets by 2030 to end the TB epidemic

- But reaching these targets will be an uphill battle

- Annual global financing for TB nearly US$3bn short

- Implementation: US$6.6bn available, US$1.7bn gap

- Research and development: US$0.7bn available, US$1.1bn gap
