1. Purpose of the Consultancy

Traditional, Complementary and Integrative Medicine (TCI) team requires expertise in the areas of clinical terminology & classification, knowledge capacity building, web and database management, and traditional and complementary medicine (T&CM) database establishment and management including the design & technical contents and monitoring & coordination according to the PB 2016-2017 and the project cooperation plan between WHO and SATCM, China.

The consultant will support TCI team in developing the T&CM terminology and knowledge platform; identifying and initiating cooperation between TCI and other WHO teams; maintaining and updating the relaunched TCI web site; analysing how TCI contributes to achieving UHC and SDG3.

2. Background

The standards & norms setting and knowledge capacity building in the area of T&CM is an important part of the work in Traditional, Complementary and Integrative Medicine (TCI) in SDS department, in particular in the implementation of WHO Traditional Medicine Strategy 2014-2023 and WHA resolution on traditional medicine (WHA67.18) to address the global challenges in this area. Currently, TCI team is short of human resource particularly with expertise in the area of clinical terminology & classification, knowledge capacity building database management. The TCI team needs to be supported for the urgent on-going tasks in the area of terminologies and knowledge capacity building in T&CM, web management, and T&CM database establishment and management including the design & technical contents and monitoring & coordination according to the PB 2016-2017 and the project cooperation plan between WHO and SATCM, China.

3. Planned timelines

09 November 2017 – 31 December 2017
100% FTE with TCI

4. Work to be performed

**Output 1**
Support TCI in the development of T&CM terminology and knowledge platform.

- Coordination in the development of T&CM terminology and knowledge platform in different modalities, including terminology used in the Traditional Medicine Chapter of ICD-11.
- Coordination of experts and WHO Collaborating Centres for traditional medicine in the design and establishment of T&CM terminology database and knowledge platform. Coordination in maintaining and updating the TCI website in WHO, with attention to linking to the relevant websites.

**Deliverable 1**
Achieve progress in the implementation of the proposal on standards & norms and database & platform setting regarding traditional, complementary and integrative medicine(TCI) in the collaborative work plan in relevant WHO CCs for traditional medicine:

- Coordinate the development and implementation of the proposal.
• Progress achieved in the development and implementation.

**Output 2**
Identify and initiate cooperative activities between TCI and other WHO teams, in particular in the areas of e-Health, Rehabilitation and Ethical issues.

**Deliverable 2**
Achieve progress regarding the development of joint products among WHO programs:
- Identify and develop the proposal on joint project in the above areas.
- Support countries on TCI regulation and management as requested.

**Output 3**
Support TCI in analysing how TCI contributes to achieving the Sustainable Development Goal 3:
- Characterization of how TCI contributes to Universal Health Coverage, focusing on aspects of promotion of well-being/wellness and mental health, and linkage to SDG3.
- Coordination on initiating related TCI activities.

**Deliverable 3**
Achieve progress in drafting a proposal on the topic above:
- Drafted outline of the proposal
- Progress achieved in drafting the proposal
