

Seat-belts

Wearing a seat-belt reduces the risk of death among front-seat passengers by 40–65% and can reduce deaths among rear-seat car occupants by 25–75%.

- This survey found that only 57% of countries require seat-belts to be used in cars by both front-seat and rear-seat passengers (38% of low-income countries, 54% of middle-income countries and 83% of high-income countries).

Seat-belt laws by country/area
