

**Rolling Revision of
the WHO Guidelines for Drinking-Water Quality**

Document title:

Nutrient minerals in drinking-water and the potentials health consequences of long-term consumption of demineralized and remineralized and altered mineral content drinking waters

Paper title:

Please respond as far as possible to the following questions and wherever possible provide references to information you cite.

Send by e-mail to gdwqnutrition@who.int before 30 November 2004.

Does this text respond to an issue of concern? :

sss

Does this text compete or complement other publications in the area - if so which?

Is the level of guidance and information provided appropriate?

Are there major omissions that should be corrected?

Is there superfluous information that could be omitted?

Are there errors of fact or interpretation that should be corrected - if so what?
