- water and wastewater treatment
- disinfection
- disinfection by-products
- indicators of water and waste quality
- regulatory issues and standard development
- water quality surveys
- monitoring
- microbial toxins (including cyanobacteria)
- chemical and physical quality of water as it affects health
- endocrine disruptors
- taste and odour
- impacts of water quality on food quality
- impact of climate change on water quality
- water-based diseases
- water-based insect vectors of disease
- water policy and health
- health effectiveness of water management
