

# CONTENTS

<b>Message from the Director-General</b>	vi
<b>Overview</b>	viii
Global public health threats in the 21st century	x
Epidemic-prone diseases	x
Foodborne diseases	xi
Accidental and deliberate outbreaks	xi
Toxic chemical accidents	xi
Radionuclear accidents	xi
Environmental disasters	xii
Global collaboration to meet threats to public health security	xii
Chapter summaries	xiv
<b>Chapter 1. Evolution of public health security</b>	1
Building on historical landmarks	2
Plague and quarantine	2
Cholera and sanitation	4
Smallpox and immunization	5
Fostering international cooperation	6
A new code for international health security	8
International preparedness for chemical emergencies	10
New health regulations in a vastly altered world	11
<b>Chapter 2. Threats to public health security</b>	17
Human causes of public health insecurity	17
Inadequate investment	18
Unexpected policy changes	20
Public health consequences of conflict	21
Microbial evolution and antibiotic resistance	22
Animal husbandry and food processing	24
Human bovine spongiform encephalopathy	24
Nipah virus	24
Weather-related events and infectious diseases	25
Other public health emergencies	26
Sudden chemical and radioactive events	27
Industrial accidents	29
Natural phenomena	31

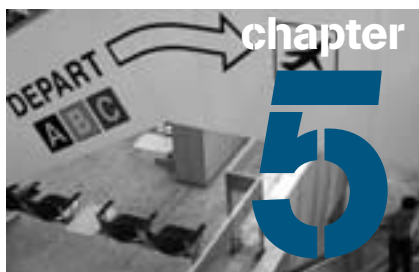

<b>Chapter 3. New health threats in the 21st century</b>	35
The anthrax letters	35
SARS: vulnerability revealed	37
Dumping of toxic chemicals	40

<b>Chapter 4. Learning lessons, thinking ahead</b>	45
Pandemic influenza: the most feared security threat	45
WHO's strategic action plan for pandemic influenza	52
Extensively drug-resistant tuberculosis	52
Managing the risks and consequences of the international spread of polio	54

<b>Chapter 5. Towards a safer future</b>	57
Helping countries helps the world	58
Global partnerships	58
Strengthening national capacity	61
Preventing and responding to international public health emergencies	63
Legal issues and monitoring	64
<b>Conclusions and recommendations</b>	66
<b>Index</b>	69

## Figures – Chapters

Figure 1.1	Spread of bubonic plague in Europe	3
Figure 1.2	Examples of international epidemic response missions, 1998–1999	8
Figure 1.3	International public health security: a global network of national health systems and technical partners, coordinated by WHO, founded on four major areas of work	10
Figure 1.4	Selected emerging and re-emerging infectious diseases, 1996–2004	12
Figure 2.1	Twenty-five years of HIV/AIDS	18
Figure 2.2	Global outbreaks, the challenge: late reporting and response	19
Figure 2.3	Evolution of penicillin resistance in <i>Staphylococcus aureus</i> : a continuing story	23
Figure 3.1	Probable SARS transmission on flight CA112 in March 2003	38
Figure 3.2	Direct economic impact of selected infectious disease outbreaks, 1990–2003	40
Figure 4.1	WHO influenza surveillance network	46
Figure 4.2	Cumulative number of confirmed human cases of avian influenza A/(H5N1) reported to WHO since 2003	48
Figure 4.3	Poliovirus importations, 2003–2006	54
Figure 5.1	Events that may constitute a public health emergency of international concern: the decision instrument	59
Figure 5.2	Verified events of potential international public health concern, by WHO region, September 2003–September 2006	63

## Boxes – Chapters

Box 1.1	Public health security	1
Box 1.2	International collaboration on infectious disease control	7
Box 2.1	Marburg haemorrhagic fever and health systems in conflict situations	21
Box 2.2	The deliberate use of chemical and biological agents to cause harm	27
Box 3.1	Economic impact of SARS and influenza pandemics	39
Box 3.2	The role of the mass media in risk perceptions	41
Box 4.1	WHO meeting concludes that global stockpiles of H5N1 vaccines are feasible	50
Box 5.1	IHR (2005) – early implementation efforts	61

## Tables – Chapters

Table 2.1	Examples of major chemical incidents (1974–2006)	28
Table 5.1	Seven strategic actions to guide IHR (2005) implementation	60
