- ambulatory care
  - generalist vs specialist 53
  - professionals, conventional health care 55
- avian influenza (H5N1) 68
- Ayurvedic medicine training 44

## B

- Bangladesh
  - inequalities in health/health care 10
  - neglect of health infrastructure 2–8
  - patterns of exclusion 28
  - quasi-public NGOs 111
  - resource-constrained settings 87
  - rural credit programmes 48
- Belgium, local authorities, support of intersectoral collaboration 35
- benefit packages, defining 27
- Benin, inequalities in health/health care 10
- birthing care
  - empowering users to contribute to their own health 48
  - professionalization 17, 28
- births and deaths, unrecorded/uncounted 74
- Bolivia, inequalities in health/health care 10
- Bosnia and Herzegovina, inequalities in health/health care 10
- Botswana, inequalities in health/health care 10
- Brazil
  - Family Health Teams 67
  - human resource issues (PAHO) 88
  - Integrated Management of Childhood Illness (IMCI) 67
  - policy dialogue 86
- Burkina Faso, institutional capacity for health-sector governance 92
- Burundi, Enhanced Heavily Indebted Poor Countries (HIPC) initiative 106

## C

- Cambodia
  - inequalities in health/health care 10
  - progressive roll-out of rural coverage 30
- Campbell Collaboration 74
- Canada
  - policy dialogue 86
  - SARS leading to establishment of a national public health agency 64
- cancer screening 9
- capacity for change
  - critical mass 90
  - limitations of conventional capacity building in low- and middle-income countries 91
- Caribbean, professionalization of birthing care 17
- Central Asia, professionalization of birthing care 17
- Central and Eastern Europe and the Commonwealth of Independent States (CEE-CIS), disengagement from health provision 83
- cerebrovascular disease, tobacco-related 9
- Chad
  - neglect of health infrastructure 27–8
  - patterns of exclusion 28
- Chile
  - administrative structures redefined 93
  - benefit package as an enforceable right 104–5
  - integrating health sector information systems 35
  - outreach to families in long-term poverty 33
  - Regime of Explicit Health Guarantees 87
  - targeting social protection 33
  - under-five mortality 1975–2006 2
- China
  - ambitious rural PHC reform 93
  - deregulation of health sector (1980s) 83–4
  - health expenditure 84
  - outbreak of SARS in 2003 64
  - re-engagement of health care 84
- chronic disease, prevention in developing countries 65
- chronic obstructive pulmonary disease, tobacco-related 9
- civil registration 74
- Cochrane Collaboration 73
- Codex Alimentarius Commission (1963) 76
- Columbia
  - inequalities in health/health care 10
  - patterns of exclusion 28

commercialization of health care  
 alternatives to unregulated commercial services 31  
 consequences for quality and access to care 14  
 unregulated, drift to 13–14  
 in unregulated health systems 11, 14, 106  
 Commission on Social Determinants of Health (CSDH),  
 recommendations 69  
 community health workers, bypassing 16  
 Comoros, inequalities in health/health care 10  
 comprehensiveness  
 better vaccination coverage 49  
 evidence of its contribution to quality of care and better  
 outcomes 48  
 conditional cash transfers 33  
 continuity of care 53, 57  
 contraceptive prevalence, sub-Saharan Africa 3  
 conventional health care  
 ambulatory care professionals 55  
 switch to PHC 56  
 vs people-centredness 43  
 coordination (gatekeeping) role of ambulatory care  
 professionals 55  
 Costa Rica  
 bias-free framework of health systems 36  
 local reorganization, template for national effort 36  
 universal coverage scheme 25  
 Cote d'Ivoire  
 GDP 4  
 inequalities in health/health care 10  
 mother-to-child transmission (MTCT) of HIV 44–5  
 Cuba, maximizing society's resources 65

## D

*Declaration of Alma-Ata on Primary Health Care* (1978) ix, xiii,  
 34, 69  
 Democratic Republic of the Congo  
 health budget cuts 7  
 institutional capacity for health-sector governance 92  
 rebuilding leadership in health, post-war and economic  
 decline 94  
 robustness of PHC-led health systems 31  
 safari surgery 14  
 Demographic and Health Survey (DHS) data 34–5  
 developing countries, chronic disease burden 65  
 diasporas 108  
 dietary salt reduction 65  
 disease control programmes 16  
 return on investment 13  
 vs challenges of health systems 83  
 vs people-centred PHC 43  
 disengagement from health provision, CEE-CIS 83  
 documentation and assessment 74

domestic investment, re-invigorating health systems xx  
 drugs

## GDP

- growth in GDP xviii
  - life expectancy at birth, 169 countries 4
  - percentage of GDP used for health (2005) 82
  - trends per capita and life expectancy at birth, 133 countries 5
- generalist ambulatory care 53
- global expenditure
- medical equipment and devices 12
  - percentage of GDP used for health (2005) 82
  - pharmaceutical industry 12
- global trends
- city dwelling 7
  - life expectancy 4
  - that undermine health systems' response 11–12
- globalization xiii–xiv
- adjusting to 76
  - global health interdependence 76
- governments
- as brokers for PHC reform 82–6
  - or quasi-governmental institutions, participation and negotiation 85
- grassroots advocacy 35–6
- growth, and peace 6
- growth market in medical tourism 104
- Guinea, inequalities in health/health care 10

**H**

- Haiti, institutional capacity for health-sector governance 92
- health, feature of development and social cohesion 111
- Health Action Zones, United Kingdom 36
- health equity 34–5
- central place of 15, 24–5
  - common misperceptions 34–5
  - “health in all policies” concept 64
- health expenditure *see* total health expenditure
- health hazards, political fall-out from 16
- health inequities 15, 24, 32
- Aboriginal and non-Aboriginal populations 32
  - catastrophic expenditure related to out-of-pocket payment 24
  - Equity Gauges 88
  - increasing the visibility 34
  - political proposals, organized social demand 35
  - see also* fragmentation of health care
- health systems
- changing values and rising expectations 14–15
  - components and provision of services 66
  - consistent inequity 24
  - dangerous oversimplification in resource-constrained settings xviii
  - defining essential packages 27

- diversion from primary health care core values 11
  - expectations for better performance xiv
  - failure to assess political environment 9–10
  - inequalities in health/health care 10, 15, 24, 32, 34–5
  - little anticipation and slow reactions to change 9–10
  - making more people-centred 16
  - Medisave accounts 50
  - mismatch between expectations and performance xv
  - mitigating effects of social inequities 36
  - moving towards universal coverage 25–7
  - PHC reforms necessary (4 groups) xvii
  - shift of focus of primary health care movement xvi
  - three bad trends xiv
  - universal coverage 25
  - see also* primary health care (PHC) reforms; public policy-making
- health-adjusted life expectancy (HALE) 6
- health-care delivery
- five common shortcomings xv
  - reorganization of work schedules of rural health centres 42–3
- health-sector governance, institutional capacity 92
- “Healthy Islands” initiative 30
- heatwave, western Europe (2003) 54
- Heavily Indebted Poor Countries (HIPC) initiative 106
- high spending on health, better outcomes 5
- high-expenditure health economies 100, 101–3
- HIV infection, mother-to-child transmission (MTCT) 44
- HIV/AIDS, continuum of care approaches 68
- hospital-centrism 11
- opportunity cost 12

**I**
